

ASAM The Voice of Addiction Medicine
American Society of Addiction Medicine

Stay Informed To Make the Right Decisions, At the Right Time

ASAM and Guideline Central have collaborated to develop new quick-reference printed pocket cards and digital apps to support the publication of the full-text ASAM National Practice Guideline for the Use of Medications in the Treatment of Addiction Involving Opioid Use.

What's Inside?

- Key Points
- Assessment Recommendations
- Diagnosis Recommendations
- Treatment Recommendations
 - › Setting
 - › Withdrawal Management
 - › Methadone
 - › Buprenorphine
 - › Naltrexone
 - › Naloxone for Opioid Overdose
 - › Psychosocial Treatment
- Special Populations
 - › Pregnant Women, Individuals with Pain, Adolescents, Co-Occurring Psychiatric Disorders, Individuals in the Criminal Justice Systems
- Tables
 - › Opioid Intoxication and Withdrawal Signs
 - » SOWS, COWS, OOWS
 - › Physical Exam Findings in Substance Use Disorders
 - » Treatment Medications
 - » Medication Comparison
 - » Bioequivalence of Buprenorphine Formulations
 - » Opioid Overdose Medications
 - » Switching Drugs Equivalents
- Algorithms
- And More...

Digital App Features:

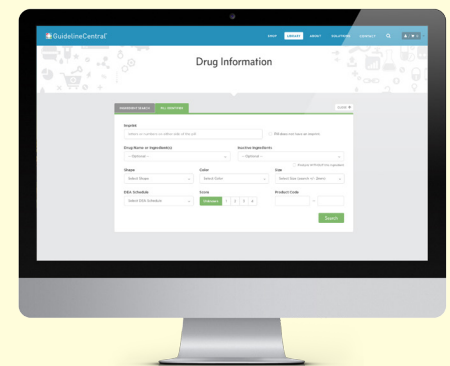

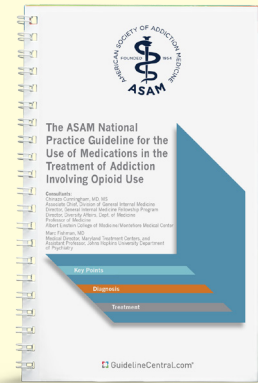

App Includes:

- Official recommendations from ASAM
- Key points, treatment, management, prevention, and more
- Easy navigation to critical information
- Well illustrated algorithms, charts, medical tables
- Comprehensive drug information
- Calculators (COWS, OOWS, SOWS, Bioequivalence, and more)
- Links to other ASAM content - Standards, Criteria, etc.

General Features:

- Notes, annotation and bookmark functionality
- Full text search within each guideline and throughout the library
- Adjust text size, font, and color for easy reading
- Instant updates to all content on every device
- Online and offline functionality
- Free access to MEDLINE/PubMed, Clinical Trials, Guideline Summaries
- And More...

CONVENIENT FORMATS

Why Use GUIDELINES Pocket Cards and Apps?

- Practical and easy to use
- Compact and portable
- Provides rationale for every recommendation
- Up-to-date and accurate
- Best of all...everything Inside is completely evidence based!
