Innovations in Addiction Medicine and Science

Austin, TX | April 23-26, 2015

FINAL PROGRAM
Impacting more than 150 million healthcare decisions a year.

**Clinical lab testing** from the leaders in diagnostic information and testing services.

Visit **Quest Diagnostics at booth 404** at the ASAM Conference in Austin.

QuestDiagnostics.com/PDM
Howdy! Welcome to the NEW ASAM 46th Annual Conference! It is my pleasure to welcome you to Austin, TX as we focus on Innovations in Addiction Medicine and Science.

The conference features the latest innovations in science and business and highlights best practices in clinical integration. You’ll engage with cutting-edge speakers, renowned practice improvement experts and leading researchers as they explore topic areas vital for addressing challenges and advancing the treatment of addiction disorders.

The exhibit hall features over 100 exhibitors showcasing healthcare products, services and resources of importance to you. Over 40 poster presentations highlighting the newest research and late breaking clinical findings will be on display. You’ll have plenty of time to have fun and network during the Rodeo Reception, refreshment breaks, the Annual Awards luncheon, the newly offered Meet & Eat Dutch Treat Dinners, and the early morning exercise activities.

The Annual Conference Program Committee, ASAM Staff, Sponsors, Exhibitors and Presenters have dedicated months of effort to make sure every focus session, workshop, symposium and poster is interactive, informative and educational. I am confident you will have an outstanding learning experience and have fun at this newly formatted Annual Conference. I encourage you to share your experience through many of the social media channels that will be promoted throughout the conference.

Enjoy the conference and remember to save the date for next year in Baltimore, MD April 14-17, 2016.

Sincerely,

Stuart Gitlow, MD, MBA, MPH, DFAPA
President, American Society of Addiction Medicine

EDUCATIONAL PURPOSE

ASAM’s 46th Annual Conference presents the most up-to-date information, research, guidance and policy discussions for professionals in the addiction medicine field.

Goals and Learning Objectives

- Bring science into practice by focusing on the latest developments in research and treatment and translating them into clinically useful knowledge.
- Engage participants in dialogue around strategic directions for future innovations.
- Present concise, interactive, case-based and creative teaching methods through a variety of live learning formats and methodologies.
- Encourage involvement of early-career professionals and diverse populations in the field of addiction medicine.
- Explore strategic opportunities for integration of addiction medicine, diagnosis, treatment and patient care into the everyday functions of family, community, educators, primary care physicians and public policy advocates.
- Provide participants the opportunity to network and interact with experts in their field.

At the conclusion of the conference, participants should be able to:

- Apply acquired knowledge of innovative clinical approaches to treatment in practice among a variety of general and special populations.
- Understand the importance of and how to implement an integration strategy in their own community or practice area.
- Contribute to the development of new science and treatments in addiction medicine.

www.TheASAMAnnualConference.org
In 1990 ASAM leadership made a promise to honor the legacy of ASAM Founder, Ruth Fox, MD by establishing the Ruth Fox Memorial Endowment with a goal to raise $10 million dollars. To date, the Endowment has achieved $3.6 million.

The endowment builds a sustainable funding source to support the organization’s ability to respond to major changes and pursue opportunities to grow and expand while member dues and other revenue sources provide resources to carry out the organization’s ongoing body of work.

Help secure the future of the profession

**ASAM is here for you - pledge now!**

**8 LEVELS OF GIVING**
- Visionary Circle: $200,000 and above
- Luminary Circle: $100,000 - $199,999
- Diamond Circle: $75,000 - $99,999
- Platinum Circle: $50,000 - $74,999
- Gold Circle: $25,000 - $49,999
- Silver Circle: $15,000 - $24,999
- Bronze Circle: $5,000 - $14,999
- Crystal Circle: up to $4,999

“A Promise to Keep”
Let’s reach the $10M pledge goal!

Look for the pledge information in your ASAM conference bag. Stop by ASAM Central (by Registration Area) for more information.
**WELCOME RECEPTION IN THE EXHIBIT HALL**

Austin Grand Ballroom, Sixth Floor  
**Thursday, April 23 | 5:30 pm - 7:00 pm**

---

**THE ASAM RODEO RECEPTION**

Put on your blue jeans and grab your ten-gallon hat and boots. Kick up your heels and enjoy a down home Texas reception while showing off your best 12-Step 2-Step. Get ready to have a rip-roarin’ time with good music, good food and good fun!  
Foyer, Sixth Floor  
**Friday, April 24 | 5:30 pm - 7:30 pm**

---

**BROWN BAG LUNCH & TERRACE CHAT**

For those unable to attend The ASAM Annual Awards Luncheon, bring your brown bag lunch and chat with colleagues on the 6th Floor Terrace of the Austin Hilton. Enjoy the view while engaging in interesting conversation with peers to discuss whatever is on your mind.  
Outside Terrace, Sixth Floor  
**Saturday, April 25 | 1:00 pm - 2:30 pm**

---

**MEET & EAT – DUTCH TREAT DINNERS**

Don’t dine alone - enjoy a casual dinner with colleagues led by an ASAM Ambassador. Choose from a number of unique Austin eateries and different cuisines to meet new friends as you get a taste of the town. (Dinner is at your own cost – not covered by ASAM).  
**Sign up at ASAM Central, Foyer Fourth Floor**  
**Thursday, April 23 | 7:30 pm - 9:00 pm**  
**Saturday, April 25 | 6:00 pm - 7:30 pm**

---

**THE ASAM MOVIE NIGHT**

Featuring: The Hungry Heart  
The Hungry Heart provides an intimate look at the often hidden world of prescription drug abuse through the eyes of Vermont pediatrician Fred Holmes, who works with patients struggling with this disease. Enjoy popcorn and refreshments as you watch the film and stay for a lively discussion following the movie.  
Governor’s Ballroom E, Fourth Floor  
**Saturday, April 25 | 8:00 pm – 10:00 pm**

---

**MORNING FUN WALK/RUN, YOGA/MEDITATION**

Join your colleagues and kick off the day with an energizing walk or run of your choice. Guides will lead participants around designated routes.  
**Sign up at ASAM Central, Foyer Sixth Floor**  
**Friday, April 24 | 6:00 am - 7:00 am**  
**Saturday, April 25 | 6:00 am - 7:00 am**

---

**PASSPORT GAME FOR ATTENDEES**

For the first time, conference attendees have the opportunity to learn and win prizes through the new, interactive Exhibit Hall Passport Game. This exhibit hall game is available to all attendees on the official conference app. Learn and have fun while playing to win prizes as you walk through the exhibit hall.  
**See Page 47 for more details.**

---

**NETWORK AT RECEPTIONS & BREAKS**

Don’t Miss - Ice Cream Novelties and Networking Reception  
Exhibit Hall - Austin Grand Ballroom, Sixth Floor  
**Friday, April 24 | 3:00 pm - 4:00 pm**
ASAM has assembled an array of education programming presented by over two-hundred clinicians, researchers and other experts in the field of addiction medicine. To help you navigate this content and identify a personalized learning experience, please review the following definitions and guidance aids.

### SESSION DESCRIPTIONS

**Focus Sessions (1 – 1.5 hours):** are concentrated presentations of clinical or scientific material designed to give learners an in-depth understanding of a specific topic. Topics include diagnostic approaches and specialized treatment areas, or translating research findings into practical clinical terms. Sessions will be presented in a structured didactic format, creative teaching methods and time for questions may also be included.

**Poster Presentations:** offer an opportunity to share research interests and ideas. All poster presentations are set up and displayed during the entire conference in the designated area of the ASAM Exhibit Hall. Presenters attend their poster during a designated period for information presentation and Q&A. Accepted poster presentations will be displayed on the website of the *Journal of Addiction Medicine*.

**Symposium Sessions (1.5 hours):** special sessions developed by invited experts in the field of addiction medicine and the Annual Conference Program Committee, including specialized presentations sponsored by the National Institute on Alcohol Abuse and Alcoholism (NIAAA), the National Institute on Drug Abuse (NIDA) and the Substance Abuse and Mental Health Services Administration (SAMHSA).

**Workshop Sessions (1 – 1.5 hours):** offer an interactive format that deal with topics and issues best handled informally in give-and-take sessions of small groups, offering participants an opportunity for hands-on experience, utilizing cases, viewing of demonstrations, and emphasis on audience participation in discussions, skill-building exercise, etc. Workshops include the development of special skills, particular diagnostic or treatment problems, or other issues requiring the active exchange of ideas.

### SESSION IDENTIFICATION ICONS

<table>
<thead>
<tr>
<th>ICON</th>
<th>TITLE</th>
<th>SESSION TYPE</th>
</tr>
</thead>
<tbody>
<tr>
<td>🎓</td>
<td>Early Career Learning</td>
<td>Physicians, investigators, researchers or other health care professionals, who are in the first few years of their profession and interested in learning more about addiction medicine.</td>
</tr>
<tr>
<td>🏥</td>
<td>Clinical Skills and Innovations</td>
<td>Experienced physicians, or other health care professionals who see patients daily looking for new, immediately applicable skills or techniques to use. Sessions may also review best practices in different treatment modalities or teach brand new treatment approaches.</td>
</tr>
<tr>
<td>📞</td>
<td>Interactive Learning</td>
<td>These sessions use innovative and interactive instructional formats to teach skills and new knowledge. Participants should expect case studies, demonstrations, role-playing and many other non-traditional teaching methods.</td>
</tr>
<tr>
<td>🌶️</td>
<td>Hot Topics</td>
<td>Sessions will cover hot topics and contemporary issues in the addiction medicine field.</td>
</tr>
<tr>
<td>👥</td>
<td>Special Populations</td>
<td>Sessions for physicians, investigators, researchers, or other health care professionals who treat substance use in populations with special treatment considerations such as adolescents, pregnant women, or prison populations.</td>
</tr>
<tr>
<td>🛡️</td>
<td>Practice Integration</td>
<td>Sessions will appeal to addiction medicine specialists who want to learn about different models of integration. This will also appeal to primary care physicians, and other clinicians who are interested in learning more about addiction medicine and how to integrate the new knowledge into their practices.</td>
</tr>

FULL CONFERENCE REGISTRANT BENEFITS

Full conference registrants of the 2015 ASAM 46th Annual Conference and the Pain and Addiction: Common Threads XVI Course receive complimentary access to:

- The NEW ASAM e-Learning Center (e-LC) is designed to be easier to navigate and access courses, resources and future education modules.
- Access to recorded conference/course sessions in the e-LC within 30 days following the conference.
- Complimentary access to the conference app for note taking and viewing session slides in advance and at the conference.

Note: One day registrants and others not registered for the ASAM 46th Annual Conference or Pain and Addiction: Common Threads XVI may purchase courses on the e-Learning Center within 30 days following the conference.

HOW TO ACCESS THE E-LEARNING CENTER

visit www.asam.org and click on the e-Learning Center button located on the ASAM website home page.

CLAIMING CME

CME for the ASAM 46th Annual Conference and Pain and Addiction: Common Threads XVI Course may be claimed along with past courses online through the ASAM e-LC.

The Fundamentals of Addiction Medicine registrants will be sent CME information following the course.
WHY DOES ASAM HAVE A NEW e-LEARNING CENTER?
You asked, we listened! The NEW ASAM e-LC is designed to be user friendly:
• Intuitive and easier to navigate
• Quicker to identify your interests
• Enhanced to provide more content and resources
• Easier to review and use CME transcripts
• A Better Experience!

WHAT DOES THE e-LC OFFER?
• **Claim CME:** CME for the ASAM 46th Annual Conference and Pain and Addiction: Common Threads XVI Course may be claimed along with past courses online through the ASAM e-LC

• **Re-Experience the Conference:** full conference registrants of the ASAM 46th Annual Conference and the Pain and Addiction: Common Threads XVI Course receive complimentary access to recorded sessions and resources in the e-LC within 30 days following the conference.

*NOTE: ASAM provides access to presentations for review and note taking through the conference App.*

HOW TO ACCESS THE E-LEARNING CENTER and CLAIM CME?
Visit [www.asam.org](http://www.asam.org) and click on the e-Learning Center button located on the ASAM website homepage.

**Full Registrants – Annual Conference and Pain and Addiction**
1. Select the conference attended
2. Select the sessions attended
3. Enter verification code when prompted

**Daily Annual Conference Registrants and Full Fundamentals Course Registrants**
1. Registrants will not receive these courses in the e-LC
2. Registrants will receive evaluation and CME information from ASAM via email within 2 weeks

*NOTE: Your login will be your email address and your password will be your last name (lower-case).*
**CME — TRACKING SHEET FOR CLAIMING CREDITS**

Use this page to keep a record of your CME hours. All CME hours will be claimed online on the ASAM e-Learning Center. You can claim CME at the end of each day, at the end of the conference, or upon your return home. **Total CME hours for the ASAM Annual Conference cannot exceed 20 and total CME hours for the Pre-Conference Courses cannot exceed 8.**

**THURSDAY, APRIL 23, 2015**

**PRE-CONFERENCE COURSES**
- The ASAM Fundamentals Course (8 CME)
- The ASAM Pain and Addiction Course (8 CME)

**EVENING SESSIONS**
- Addiction Medicine Fellowship Workshop (1.5 CME)
- Maintenance of Certification: What the Addiction Medicine Doctor Needs to Know (1.5 CME)

**FRIDAY, APRIL 24, 2015**

**MORNING SESSIONS**
- General Session - Opening Scientific Plenary & Distinguished Scientist Lecture (1.5 CME)
- Focus Session - A “Novel” Group Approach to Removing Barriers to Long Term Recovery (1.5 CME)
- Symposium - Integrated Care Models: Evidence - Based Approaches (1.5 CME)
- Symposium - President's Symposium - Marijuana: Patient to Policy (1.5 CME)
- Workshop - Recovery Focused Treatment for Nicotine and Tobacco Dependence (1.5 CME)
- Focus Session - Sexual Orientation, Gender Identity, and Sex Development Competencies & Addiction Medicine (1.5 CME)
- Focus Session - The Use of Buprenorphine in Abstinence Based Treatment (1.5 CME)

**AFTERNOON SESSIONS**
- General Session - Opening Scientific Plenary & Distinguished Scientist Lecture (1.5 CME)
- Poster Presentations (2 CME)
- ABAM: Status of Certification, Maintenance of Certification, Fellowships, and ABMS Recognition (0.75 CME)
- Workshop - Alternatives to Medication for Treating Traumatic, Physical and Psychospiritual Pain in Recovery (1 CME)
- Focus Session - Medical Management for Opioid Use Disorders: Current Evidence and Future Directions (1 CME)
- Focus Session - Treatment of Opioid Use Disorder within Correctional Facilities (1 CME)
- Workshop - Trends in Treatment for Youth Opioid Addiction (1 CME)
- Workshop - Prescribe to Prevent: Overdose Prevention and Naloxone Rescue for Prescribers and Pharmacists (1 CME)
- Workshop - Best Practices for the Care of Pregnant Women with Addiction (1 CME)
- Focus Session - Updates from the NIDA Clinical Trials Network: Management of Stimulant Use Disorders (1.5 CME)
- Workshop - Screening, Brief Intervention, and Referral to Treatment (SBIRT) for Perinatal Tobacco/Alcohol Use (1.5 CME)

**SATURDAY, APRIL 25, 2015**

**MORNING SESSIONS**
- General Session - The ASAM Policy Plenary (1.5 CME)
- Poster Presentations (1.5 CME)
- Symposium - Advancing the Integration of SUD Services and Health Care (1.5 CME)
- Workshop - Clinical Applications of Pharmacogenetics in Pain Management, Addiction Medicine and Behavioral Health (1.5 CME)
- Symposium - Clinical Management of Substance Abusers with Co-occurring HIV and HCV Infections (1.5 CME)
- Workshop - How To Work (and Win) with the Media (1.5 CME)
- Workshop - Motivational Interviewing: Evoking Change Humanely (1.5 CME)
- Workshop - When Opioids Fail: Treating the Patient Trapped on High Dose Opioids (1.5 CME)

**AFTERNOON SESSIONS**
- Focus Session - Designer Drugs Update 2015: Bath Salts, Spice, and N-bomb (1 CME)
- Focus Session - From Mandate to Action: Redesigning Substance Use Care in Inpatient Settings (1 CME)
- Focus Session - Going Smokefree: Implementation of a Tobacco Free Treatment Program (1 CME)
- Workshop - Integration of Addiction Treatment into Various Settings - Successes and Challenges (1 CME)
- Focus Session - Intimate Partner Violence and Relationship with Substance Addiction in Childhood and Adulthood (1 CME)
- Workshop - Twelve Step Programs as a Vehicle to Recovery (1 CME)
- Focus Session - Adolescent Vapor Use and Emerging Trend of Vaporized Illicit Substances (1 CME)
- Workshop - A Video Game Therapeutic Intervention for Youth: Demonstration of “Recovery Warrior” (1 CME)
- Workshop - Common Addiction Medicine Conundrums: “Just Bad Behavior?” & “What is Depression?” (1 CME)

**SUNDAY, APRIL 26, 2015**

**MORNING SESSIONS**
- Symposium - Cultural Competence in the Delivery of Addiction Treatment Services (1.5 CME)
- Workshop - Five-Year Recovery: A New Standard for Assessing Effectiveness of Treatment (1.5 CME)
- Symposium - Role of Cannabinoids in Medicine/Addiction Medicine/NIDA-ISAM-ASAM Collaboration (1.5 CME)
- Workshop - Urine Drug Testing “For” Your Patient Not “To” Your Patient – Part 1 (1.5 CME)
- Workshop - Addiction is Addiction: Clinical Perspectives from Definition to Practice (1.5 CME)
- Workshop - Lifelong Learning: Review of Articles for ABAM MOC Part 2 (1.5 CME)
- Workshop - Updates in Treating Sedative Dependency In Addiction And Chronic Pain (1.5 CME)
- Workshop - Urine Drug Testing “For” Your Patient Not “To” Your Patient – Part 2 (1.5 CME)
Overview
Addiction is a chronic brain disease and there are treatments available to help patients.

The ASAM Fundamentals of Addiction Medicine—A Live Course is a practical, case-based course designed to support primary care physicians and clinicians in their clinical treatment of patients at risk for or with substance use disorders (SUD). The increased interest in expanding the primary care team’s role in treating addiction has arisen, in part, because of the co-morbidities of medical illnesses among substance abuse patients. However, another facet to expanding physician and clinician roles is the development of new medications and access to those medications and medical care due to Affordable Care Act. With the increase of patient access to medical care, it is fitting that the need for substance abuse detection starts to take place in primary care practice. The ASAM Fundamentals course is the go-to course for the whole primary care team to learn more about how to provide the most effective prevention and treatment of addiction.

Please plan to bring your laptop, tablet or smart phone to the course to access resources and information during the course.

Educational Purpose
Primary care physicians and clinicians will effectively treat adult outpatients at risk for or with addictive disorders.

Learning Format and Methodologies
This live course is designed to be energetic and interactive with a facilitator at each round table. Sessions throughout the day will include approximately one-third of lecture, one-third demonstration of skills and one-third skills building. Audience response devices will also be used in the course for increased audience interaction.

Learning Objectives
Upon completion, participants should be able to:

- Identify their feelings and attitudes that promote or prevent therapeutic responses to their patients with substance use disorders.
- Summarize the three major neurocircuits underlying addictive disorders and their clinical implications.
- Use and recommend, validated universal screening tools to identify substance use in patients and demonstrate the ability with confidence to score and interpret the results for hazardous and harmful use.
- Respond to positive substance use screening results with brief counseling strategies, including motivational interviewing, appropriate to the patient’s readiness to change.
- Evoke “change talk” in patients at risk for or with substance use disorders to empathically motivate behavior change.
- Conduct a biopsychosocial and developmental ambulatory assessment of an adult with a SUD to match the patient to an appropriate level of care.
- List the indications, contraindications and duration of treatment of evidence based pharmacotherapy for alcohol, tobacco, and opioid use disorders and refer to specialty care where appropriate.
- Reflect on the role of mutual aid groups such as AA in the recovery process for patients in their practice/ communities.

Peter L. Selby, MBBS, CCFP, FCFP, DABAM, FASAM
THURSDAY, APRIL 23, 2015

8:00 am - 5:30 pm
Governor’s Ballroom DE, Fourth Floor

PRESENTERS

Peter L. Selby MBBS, CCFP, FCFP, DABAM, FASAM
Chief, Addictions Division, Centre for Addiction and Mental Health Professer, Dept. of Family & Community Medicine and Psychiatry, Dalla Lan School of Public Health, University of Toronto Toronto, ON

Miriam S. Komaromy, MD, FACP
Associate Director, Project ECHO Associate Professor of Internal Medicine, University of New Mexico Health Sciences Center Albuquerque, NM

Catherine R. Friedman, MD
Assistant Professor, Dept. of Psychiatry and Human Behavior, Alpert Medical School of Brown University Attending Psychiatrist, Bradley Hospital Providence, RI

Kenneth A. Saffier, MD
Residency Leadership Group, Contra Costa Regional FMR Martinez, CA

J. Paul Seale, MD
Professor and Director of Research, Dept. of Family Medicine, Medical Center of Central Georgia & Mercer University School of Medicine Macon, GA

Alexander Y. Walley, MD, MSc
Assistant Professor of Medicine, Boston University School of Medicine Boston, MA

Stephen A. Wyatt, DO
Medical Director Addiction Medicine, Behavioral Health, Carolinas HealthCare System Charlotte, NC

CURRICULUM PLANNING COMMITTEE

Peter L. Selby, MBBS, CCFP, FCFP, DABAM, FASAM, Chair
Miriam S. Komaromy, MD, FACP, Vice Chair
Catherine R. Friedman, MD
Peter D. Friedmann, MD, MPH, FASAM, FACP
Kenneth A. Saffier, MD
Mario F. San Bartolomé, MD, MBA
J. Paul Seale, MD
Jeanette M. Tetrault, MD, FACP
Alexander Y. Walley, MD, MSc
Stephen A. Wyatt, DO

CME COMMITTEE REVIEWERS

AGENCY SUPPORT

ASAM thanks the Substance Abuse and Mental Health Services Administration (SAMHSA) for their support of the development and implementation of The ASAM Fundamentals of Addiction Medicine – A Live Course.

CME CREDIT

The American Society of Addiction Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The American Society of Addiction Medicine designates this live activity for a maximum of 8 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
OVERVIEW
In the 16th year of The ASAM Pain and Addiction Common Threads Course, experts in the field will examine evidence-based methods of pain management that involve minimal or no use of prescription opioids. Through the use of five clinical cases, faculty will demonstrate how to treat varied types of pain patients. Faculty will use role play in combination with short lectures to model and explain the best approaches to treatment for the unique patients. In addition to learning different approaches to pain management, course attendees will learn how to use motivational interviewing effectively and how to get the most out of their patient interactions. Course attendees will leave the course with new knowledge and a set of skills that can be immediately applied to their clinical practice.

EDUCATIONAL PURPOSE
Physicians and other members of the medical care team will understand how to approach and treat patients with varied types of pain through limited or no use of opioids.

LEARNING FORMAT AND METHODOLOGIES
Each of the sessions in this course will cover one clinical case. The presenters of each session will follow the case from patient intake to subsequent follow-up visits. Presenters will alternate between demonstrating patient/provider interactions at each stage of treatment and providing explanations about the treatment approaches. A large portion of the afternoon will also be devoted to panel discussion, questions and answers, and cases from the audience. Audience response devices will also be used in the course for increased audience interaction.

LEARNING OBJECTIVES
Upon completion, participants should be able to:
- Describe risks and complications of prescription opioid use in addiction and chronic pain patients.
- Identify at least three non-opioid based methods of pain management and their risks and benefits.
- Differentiate between non-opioid based treatment approaches and apply them correctly to treat varied types of pain.
- Confidently explain treatment approaches to their patients and anticipate common patient questions.
THURSDAY, APRIL 23, 2015

8:00 am - 5:30 pm
Governor’s Ballroom C, Fourth Floor

PRESENTERS

R. Corey Waller MD, MS, FACEP, DABAM – Chair
Director, Center for Integrative Medicine
SUD Medical Director, Lakeshore Regional Partners
Med. Staff Chief, Division of Pain Management
Spectrum Health
Grand Rapids, MI

Mark A. Weiner, MD – Vice Chair
Physician, Internal Medicine
Pain Recovery Solutions
Ypsilanti, MI

Herbert L. Malinoff, MD, FACP, FASAM – Immediate Past Chair
Clinical Assistant Professor, Department of Anesthesiology
University of Michigan Medical School
Ypsilanti, MI

Melvin I. Pohl, MD, FASAM
Medical Director
Las Vegas Recovery Center
Las Vegas, NV

Ilene R. Robeck, MD
Director of Virtual Pain Education and Consulting
Richmond VA Medical Center
Internist
Bay Pines VA Hospital
St. Petersburg, FL

Christopher J. Spevak MD, MPH, JD
Clinical Professor of Anesthesiology
Georgetown University School of Medicine
Washington, DC

Howard C. Wetsman, MD, DABAM, FASAM
Chief Medical Officer
Townsend
New Orleans, LA

PROGRAM PLANNING COMMITTEE

R. Corey Waller, MD, MS, FACEP, DABAM, Chair
Mark A. Weiner, MD, Vice Chair
Herbert L. Malinoff, MD, FACP, FASAM, Immediate Past Chair
Melvin I. Pohl, MD, FASAM
Ilene R. Robeck, MD
Howard C. Wetsman, MD, FASAM

CME COMMITTEE REVIEWERS

Adam J. Gordon, MD, MPH, FACP, CMRO, FASAM
James L. Ferguson, DO, FASAM

CME CREDIT

The American Society of Addiction Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The American Society of Addiction Medicine designates this live activity for a maximum of 8 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

The ASAM Blended Buprenorphine Courses combines 4 hours of online independent self-paced study with 4 hours of live classroom or live webinar to provide the required 8 hours needed to obtain the waiver to prescribe buprenorphine in office-based treatment of opioid use disorders.

- National expert faculty
- Cutting edge curriculum with latest updates on clinical practice
- Flexible learning plan offering interactive learning with less time away from practice
- Learn high quality, evidence based practices
- Case-based interactive learning

**PROGRAM DETAILS**

**TUESDAY, APRIL 21, 2015**

3:00 pm – 5:00 pm  
*Finance Committee Meeting*  
415B, Fourth Floor

6:00 pm – 9:00 pm  
*Board of Directors Meeting*  
406, Fourth Floor

**WEDNESDAY, APRIL 22, 2015**

7:30 am – 9:00 am  
*Corporate Roundtable*  
400, Fourth Floor

8:30 am – 4:00 pm  
*Board of Directors Meeting*  
406, Fourth Floor

5:00 pm – 8:00 pm  
*Registration Open*  
Governor’s Ballroom BC Foyer, Fourth Floor

5:30 pm – 6:45 pm  
*Fundamentals Table Facilitator Orientation Training*  
617, Sixth Floor

5:30 pm – 6:45 pm  
*Pain & Addiction Faculty Meeting*  
416A, Fourth Floor

9:00 pm – 10:00 pm  
*Mutual Help Meeting*  
617, Sixth Floor

**THURSDAY, APRIL 23, 2015**

7:00 am – 8:00 pm  
*Registration Open*  
Governor’s Ballroom BC Foyer, Fourth Floor

7:00 am – 8:00 am  
*Mutual Help Meeting*  
617, Sixth Floor

5:30 pm – 7:00 pm  
*Exhibit Hall Open*  
Austin Grand Ballroom, Sixth Floor

5:30 pm – 7:00 pm  
*ASAM and Shatterproof Challenge*  
Brush Square Park

ASAM and Shatterproof are combining forces to offer Annual Conference attendees an opportunity to participate in a unique fundraising rappelling event that starts at the rooftop of the Hilton Austin Hotel. The purpose of this fundraising event will help bring public awareness to the field of addiction medicine, raise public awareness and funding to help save lives, and to end the stigma and suffering of those affected by this disease.
5:30 pm – 7:00 pm
WELCOME RECEPTION IN THE EXHIBIT HALL
Austin Grand Ballroom, Sixth Floor
Join friends and colleagues for the grand opening of The ASAM 46th Annual Conference Exhibit Hall. Visit with a variety of exhibitors to learn more about the latest services, products, and tools in the field of addiction medicine. The Exhibit Hall is the vibrant hub of networking activity and fun throughout the conference. Visit the ASAM Lounge to relax and learn about new offerings and products.

6:30 pm – 7:30 pm
Twelve Step Recovery Action Group Meeting
417AB, Fourth Floor

7:00 pm – 7:30 pm
Payer Relations Committee Meeting
416A, Fourth Floor

7:00 pm – 8:00 pm
New Member and Attendee Welcome Reception
406, Fourth Floor

Ruth Fox Endowment Scholarship Meeting
614, Sixth Floor

7:00 pm – 8:30 pm
Addiction Medicine Fellowship Workshop
Kevin Kunz, MD, MPH, FASAM; Richard Blondell, MD; Scott A. Teitelbaum, MD, FAAP, FASAM; David Withers, MD; Susan E. Foster, MSW
Governor’s Ballroom DE, Fourth Floor
Fellowship programs are an increasingly important pathway for addressing the national shortage of addiction medicine physicians. Fellowship-trained specialists are not only highly sought for direct patient care, but they also serve as valued consultants in their local health systems, play leadership roles in prevention and policy issues, conduct research to generate new knowledge, and serve as role models and teachers to the next generation. There are 24 accredited addiction medicine fellowships now operating in 16 states, but a significant need exists for additional programs — the ABAM Foundation’s goal is a total of 100 by 2020. This session is designed for faculty, practitioners, administrators and others interested in starting (or helping to start) a fellowship program in their community. The panel, which includes ABAM Foundation leaders and experienced fellowship program directors, will orient participants to the various models for addiction medicine fellowships, then take them through the steps of planning a fellowship and preparing an accreditation application. Issues addressed will include: benefits of having an accredited fellowship, the building blocks of a fellowship program, budgets and funding, institutional relationships, faculty recruitment, and curriculum design. The panel will offer practical tips based on experience developing, operating and overseeing addiction medicine fellowships. Participants will also gain insight into addiction medicine’s evolving relationship to the wider community of organized medicine.

7:30 pm – 9:00 pm
MEET & EAT - DUTCH TREAT DINNERS
Austin Hilton Lobby (Meet in Lobby at 7:15 pm)
Don't dine alone - enjoy a casual Dutch Treat dinner with colleagues. Choose from a number of unique Austin eateries and different cuisines to meet new friends as you get a taste of the town. Interested participants should sign up on-site near the ASAM Registration Area. (Dinner is at your own cost – not covered by ASAM).

7:30 pm – 9:30 pm
Chapter Officers and Policy Roundtable Meeting
414, Fourth Floor

8:30 pm – 10:00 pm
Maintenance of Certification: What the Addiction Medicine Doctor Needs to Know
Lia Bennett, MPH; Kevin Kunz, MD, MPH, FASAM; Robert Sokol, MD, FACOG; Michelle Lyons, MS
Governor’s Ballroom DE, Fourth Floor
Addiction medicine is a uniquely specialized and evolving medical specialty. Addiction medicine certified physicians are at a cross-roads requiring relevant, practice-related and self-assessment educational opportunities to remain current with the fast-paced changes of the specialty. The presentations in this workshop will highlight how ABAM’s adoption and implementation of the 2015 Standards for the ABMS Program for MOC will help bring greater flexibility to learning, and improve the value and quality to each of the 4-parts of MOC. Learners in this workshop will also get an opportunity to have an in-depth interaction with ABAM MOC decision makers and staff, view updates on the ABAM MOC portal and provide feedback to help enhance the quality of addiction medicine MOC and future learning opportunities.

10:00 pm – 11:00 pm
Mutual Help Meeting
617, Sixth Floor
The ASAM 46th Annual Conference kicks off with the exciting Opening Scientific Plenary. Led by ASAM President Stuart Gitlow, MD, MPH, MBA, DFAPA, the Opening Scientific Plenary Features an exciting line-up of ASAM award winners and leaders in the Addiction Medicine field. Also featuring a welcome to Austin from TXSAM Chapter President, Jason Powers, MD.

8:30 am – 10:00 am
OPENING SCIENTIFIC PLENARY & DISTINGUISHED SCIENTIST LECTURE

Michael P. Botticelli; George F. Koob, PhD; Patrick J. Kennedy
Governor’s Ballroom DE, Fourth Floor

The ASAM 46th Annual Conference kicks off with the exciting Opening Scientific Plenary. Led by ASAM President Stuart Gitlow, MD, MPH, MBA, DFAPA, the Opening Scientific Plenary Features an exciting line-up of ASAM award winners and leaders in the Addiction Medicine field. Also featuring a welcome to Austin from TXSAM Chapter President, Jason Powers, MD.

Michael P. Botticelli – Director, The Office of National Drug Control Policy (ONDCP), Washington, DC

Special Guest

Director Botticelli will discuss the Office of National Drug Control Policy’s (ONDCP) current activities to reform our response to substance use. He will specifically focus on overdose prevention and medication-assisted treatment along with criminal justice reform.

George F. Koob, PhD – Director, National Institute on Alcohol Abuse and Alcoholism (NIAAA), Bethesda, MD

R. Brinkley Smithers Distinguished Scientist Award Winner

Dr. Koob will explore how reward and stress neurocircuitry of the brain changes during the course of the addiction cycle resulting in compulsive drug seeking behavior. Reward and stress resemble the Roman God Janus. Janus was the god of doors, passages and transitions, and his two faces look to the future and the past. Reward and stress represent different components of transitions in our brain emotional systems that lead to and perpetuate addiction. Excessive activation of the brain reward systems promotes excessive activation of the brain stress systems which in turn promotes allostatic changes in emotional processing that drive addiction.

Patrick J. Kennedy – Former U.S. Representative (D-RI), Founder of The Kennedy Forum, Brigantine, NJ

Special Guest

Patrick Kennedy, co-author of the Mental Health Parity and Addiction Equity Act of 2008 and founder of The Kennedy Forum, will talk about alcohol and drug use, addiction, and national policy from his unique perspective as a former Congressman, a member of an iconic political family, and a person in long-term recovery. He will discuss why the parity law is of crucial importance to many Americans and how we can make sure it is complied with and enforced, and he will look ahead at the place of addiction medicine in the nation’s health care system.

6:00 am – 7:00 am
MORNING FUN WALK/RUN
Hilton Austin Lobby (Meet in Lobby at 5:45 am)

Join your colleagues and kick off the day with an energizing walk or run of your choice. Guides will lead participants around designated routes. Interested participants are encouraged to sign-up on-site near the ASAM Registration Area but walk-ups are always welcome.

MORNING YOGA
Pool Deck, Eighth Floor

Join your colleagues for a morning of downward dogs and warrior poses. All levels are welcome from novice to advanced (mats will be provided). Interested participants are encouraged to sign-up on-site near the ASAM Registration Area but walk-ins are welcome. Classes will be limited to 40 participants and those who signed-up in advance will be given priority.

8:30 am – 8:15 am
Annual Member Business Meeting & Breakfast
Foyer, Sixth Floor

Begin the first full conference day with an interactive breakfast! Come and learn about the state of the organization, vote to confirm the newly-elected Board, and hear an update from ABAM. Enjoy table conversations with the new Board and celebrate the recognition of many of our dedicated volunteers.

7:00 am – 6:00 pm
Registration Open
Governor’s Ballroom BC Foyer, Fourth Floor

6:00 am – 7:00 am
MORNING FUN WALK/RUN
Hilton Austin Lobby (Meet in Lobby at 5:45 am)

Join your colleagues and kick off the day with an energizing walk or run of your choice. Guides will lead participants around designated routes. Interested participants are encouraged to sign-up on-site near the ASAM Registration Area but walk-ups are always welcome.
10:00 am – 4:30 pm
*Exhibit Hall Open*
Austin Grand Ballroom, Sixth Floor

10:00 am – 10:30 am
*Refreshment Break in the Exhibit Hall*
Austin Grand Ballroom, Sixth Floor

10:30 am – 12:00 pm
**FOCUS SESSION**

*A “Novel” Group Approach to Removing Barriers to Long Term Recovery*
Scott A. Teitelbaum, MD, FAAP, FASAM; Gregory K. Gable, PsyD

**Governor’s Ballroom D, Fourth Floor**
This session will present the 20 year experience of three doctors who developed and facilitated a structured group process in an extended residential setting. As outlined in the *Textbook of Alcoholics Anonymous*, they utilize elements of the fourth step as a framework to not only teach patients the value of steps, but a methodology that helps identify issues that would be barriers to ongoing spiritual recovery and provide a common language consistent with TSF. Clinicians and persons with addiction often underestimate the importance, depth and power of the 4th step, which opens the door to remove barriers to long-term recovery. Failure to complete a 4th step is often associated with a person having difficulty progressing in recovery and/or relapse. This group process has been helpful in identifying issues such as resentments, fears, secrets, family of origin issues and trauma in a setting that is supportive and nurturing. Further, this group process has become a valuable clinical tool that reveals much about our patient’s personality styling and character traits consistent with well-validated psychometric measures such as MMPI and the MCMI. How this group is performed will be described in detail utilizing multiple case examples of the process, which illustrate clinical observations and patient experiences.

**SYMPOSIUM**

**Integrated Care Models: Evidence - Based Approaches**
Michael Fingerhood, MD, FASAM; Norman Wetterau, MD, FASAM, FAAFP

**Governor’s Ballroom E, Fourth Floor**
More than two-thirds of individuals with addiction see a primary care provider within a six-month time frame. Thus, primary care providers have the opportunity to recognize, diagnose and help most individuals with addiction. Unfortunately, many providers avoid issues related to addiction and often do not recognize this problem in their patients. This may be because they find it easier not to address addiction, they do not feel comfortable discussing the topic, they do not know how to help, or they have a perception that little can be done. However, the primary care setting offers a safe place for patients and providers to explore addiction problems, build rapport, develop treatment plans and work together toward long term abstinence. Moreover, studies suggest that individuals with addiction benefit from having a regular source of medical care and from integration of addiction treatment with their primary medical care. This session will present various models of integrating addiction treatment into the primary care setting and examine the clinical evidence that integration is beneficial.

---

**SYMPOSIUM**

**PRESIDENT’S SYMPOSIUM - MARIJUANA: PATIENT TO POLICY**
Stuart Gitlow, MD, MPH, MBA, DFAPA; Wilson M. Compton, MD, MPE; Kevin Sabet, PhD; Kevin Gray, MD; Patrick J. Kennedy, Former U.S. Representative, (D-RI)

**Governor’s Ballroom A-C, Fourth Floor**
Numerous states and the District of Columbia have passed measures that legalize marijuana, for medical and/or recreational use and additional states are considering the same. While ASAM opposes both the “medicalization” of marijuana and proposals that legalize marijuana for recreational use, clinicians continue to debate the harms and benefits associated with this drug. ASAM President Stuart Gitlow, MD, MPH, MBA, DFAPA will moderate a discussion with leaders of the debate to explore the burning issues confronting the field today and implications that recent and anticipated changes in marijuana legislation and treatment will have on clinical practice and patient outcomes. Hear the leading marijuana experts give their perspectives in lively ten-minute TED-style talks and submit your questions for the following discussion.

*Due to the popularity of the topic, this session will be offered twice, once in the morning and once in the afternoon, 4:00 pm – 5:30 pm.*

The ASAM 46th Annual Conference: Program Details

**FOCUS SESSION**

**The Use of Buprenorphine in Abstinence Based Treatment**
A. Kenison (Ken) Roy III., MD, DFAPA, FASAM

*400/402, Fourth Floor*

There has been much controversy about the use and usefulness of buprenorphine in "abstinence based" treatment and treatment programs. The messages received in 12-Step meetings and from treatment program peers are that buprenorphine is "Just another drug" or "You are just substituting one drug for another." This has resulted in premature discontinuation and, often, subsequent relapse that requires re-initiation of medication and subsequent re-stabilization in most cases. The goal of this presentation is to review the literature surrounding abstinence based treatment for opioid addiction and maintenance therapy with buprenorphine, then discuss successful treatment protocols that were used when combining the modalities. When combined successfully, one can see participation, through completion of treatment, of patients who have been previously unable to complete, and the initiation of treatment by those who have previously been unwilling to begin.

**12:00 pm – 1:00 pm**

**ABAM Foundation Addiction Medicine Fellowship Networking Lunch**

*602, Sixth Floor*

Anyone interested in developing an accredited addiction medicine fellowship program is welcome to join faculty and fellows from the established ABAM Foundation fellowships for an informal buffet lunch where they can connect with colleagues and exchange ideas. Members of the ABAM Foundation National Center for Physician Training in Addiction Medicine will be present to answer questions.

**12:00 pm – 1:00 pm**

**Pain and Addiction Editors Meeting**

*417A, Fourth Floor*

**10:30 am – 12:00 pm**

**WORKSHOP**

**Recovery Focused Treatment for Nicotine and Tobacco Dependence**

*Terry A. Rustin, MD, FASAM*

*412, Fourth Floor*

Addiction specialists frequently face significant challenges in treating patients for their dependence on nicotine and tobacco. This workshop will discuss and then demonstrate an addiction recovery model for nicotine and tobacco dependence that is particularly useful in counseling recovering individuals who want to quit smoking. The first half of the session will briefly review nicotine dependence, identifying the similarities between nicotine dependence and other addictions; then move to a discussion of a recovery model for nicotine dependence treatment. The presenter will discuss the application of relapse prevention strategies used in recovery treatment to nicotine dependence. The second half of the session will feature demonstrations of an addiction recovery approach to nicotine and tobacco dependence counseling. These demonstrations will use a series of clinical vignettes with audience members role-playing the “patient” and the presenter role-playing the “clinician.” All participants will receive a gratis copy of the presenter’s book, Keep Quit! A motivational guide to a life without smoking, which they can use in their practices and distribute to patients, at no cost.

**12:00 pm – 2:00 pm**

**CME Committee Meeting**

*416A, Fourth Floor*

**12:00 pm – 1:30 pm**

**Lunch in the Exhibit Hall**

*Austin Grand Ballroom, Sixth Floor*

**12:00 pm – 2:00 pm**

**POSTER PRESENTATIONS IN THE EXHIBIT HALL**

*Austin Grand Ballroom, Sixth Floor*

Due to the popularity of the topic, poster sessions will be offered twice, once on Friday and once on Saturday.
Poster 1 - Fentanyl Laced Heroin use Deaths: Rising Epidemic in Philadelphia
Vishesh Agarwal, MD

Poster 2 - Urine Drug Testing for Patients on Buprenorphine – Examining Self-Reported Cocaine Use
Sarah M. Bagley, MD

Poster 3 - Overdose Risk Among Pregnant Women with Opioid Use Disorders
Sarah M. Bagley, MD

Poster 4 - Prenatal Treatment For Opioid Dependency: Results From a Large Inner-City Clinic
Kelley Saia, MD

Poster 5 - Brain Music Therapy for Insomnia and Anxiety in Addiction Treatment
Galina Mindlin, MD, PhD

Poster 6 - Urinary Concentrations of Buprenorphine and Norbuprenorphine as Indicators of Noncompliance and Diversion
Ashwin A. Patkar, MD, MRCPsych

Poster 7 - Challenges and Successes of Comprehensive Care for HIV Substance Abuse Users
Pamela Vergara-Rodriguez, MD

Poster 8 - Psychiatric Symptoms and Pain Effects on Marijuana Use and Drug Use Consequences
Nicolas Bertholet, MD, MSc

Poster 9 - Enhanced Uptake of Hepatitis C Treatment in an Opioid Treatment Program
Jenna Butner, MD

Poster 10 - Cost Burden Analysis of Relapse in Non-Pharmacologically Treated and Buprenorphine/Naloxone OPD Patients
Vladimir Zah, Phd(c), CPIAD, ACIM, BSnc

Poster 11 - Hospital-Based Peer Counseling Reduces 30 Day Deadmission of Alcohol Abusing Medical Inpatients
Terry Horton, MD

Poster 12 - Urine Drug Testing: ASAM Members’ Knowledge, Attitudes, and Practices
Steven D. Passik, PhD

Poster 13 - Advanced-Formulation Sublingual Buprenorphine/Naloxone Tablet Is Effective in Induction Treatment of Opioid-Dependent Adults
Michael Sumner, MB, BS, MRCP(UK)

Poster 14 - The Rehabilitation Effect of Tai Chi for Methamphetamine-Type Drug Abusers
Dong Zhu, PhD

Poster 15 - Buprenorphine for Pain Control in Opioid Dependent Chronic Pain Patients
Nemeth William, MD, FAASOS, DABAM

Poster 16 - Learning Collaboratives in Support of MAT in a Rural State
Clifton F. Lord, MD

Poster 17 - Efficacy of Extended-Release Naltrexone in the Treatment of Alcohol Use Disorders
Scott L. McNairy, MD, DLFAPA; Patricia Dickmann, MD; Stefania Faraco, PharmD

Poster 18 - Implementing an Electronic Health Information System to Evaluate Medication-Assisted Opioid Treatment
Lawrence S. Brown, MD, MPH, FASAM

Poster 19 - Innovative EHR Tools May Improve Documented Performance of SBIRT in Primary Care
James R. Winkle, MPH

Poster 20 - Trauma and Addiction: Implementation of Seeking Safety Across Treatment Sites
Wynne Lundblad, MD; Neeta Shenai, MD; Jody B. Glance, MD

Poster 21 - A Survey of Opioid-Dependent Patients Treated with Buprenorphine—Medication Use and Misuse
Genie L. Bailey, MD, DABAM; Richard G. Soper, MD, JD, MS, FASAM, DABAM; Michael M. Miller, MD, FASAM, FAPA, DABAM

Poster 22 - Cigarette Smoking Reduction in Opioid-Dependent Pregnant Women: What Does Success Look Like?
Arita Ram, BA, MD (expected 2017)

Poster 23 - Concerns and Perceived Barriers Related to Treatment of Opioid Addiction with Buprenorphine
Bradley Tanner, MD

Poster 24 - Integration of a Substance Abuse Treatment Program Population-Based Behavioral Health Care
Lawrence L. Weinstein, MD, ABHM

Poster 25 - Survey Finds High Rates of At-Risk Drinking Among Health Professionals in Training
Aaron Johnson, PhD; George A. Tindol, MD; James Paul Seale, MD

Poster 26 - Medications for Alcohol Use Disorders: Still Not Well Integrated Into Treatment Programs
Margaret E. Mattson, PhD; Alex Strashny, Ph.D.; Emily Goetttsche, MPH Cand.

Poster 27 - Oxidative Stress and Compensatory Anti-Inflammatory Mechanisms in Placentas of Gravid Marijuana Smokers
Tricia E. Wright, MD MS

Poster 28 - Relapse Prevention Medications for Opioid Addiction in Young Adults
Marc Fishman, MD

Poster 29 - Survey Results: Patient Attitudes and Perceptions of Medical Guidelines Surrounding Buprenorphine Treatment
Christine J. Gatto

Poster 30 - Medication Adherence and Mortality in Veterans with Comorbid Substance Use and Psychosis
Kathleen Decker, MD, DFAPA, DABAM; Stephanie Peglow, DO

Poster 31 - History of Overdose and Awareness of Naloxone in Patients Seeking Outpatient Detoxification
Julie A. Kmiec, DO; Saurabh Bhardwaj, MD

Poster 32 - Controlled Substance Prescriptions Among Patients in an Opioid Treatment Program
Heather Peterson, PA-C; Robert Roose, MD, MPH

Poster 33 - Risky Alcohol Use but Lower Injury Severity in Traumas with High BAC
Majid Afshar, MD, MSCR; Elizabeth Salisbury-Afshar, MD, MPH, FAAFP

Poster 34 - To Treat or Not Treat AUDs with Medications: Psychiatrists vs. PCPs
Caridad Ponce Martinez, MD; Nassima Ait-Daoud, MD

Poster 35 - Extended-Release Naltrexone To Prevent Relapse Among Opioid-Dependent, Criminal Justice-involved Persons
Joshua Lee, MD, MSc

Poster 36 - Community Based Treatment Models for Opioid Dependent Participants in Drug Treatment Court
Randy Brown, MD, PhD, FASAM

Poster 37 - Who’s Asking? Variations in Self-Reported Substance Abuse
Crispa J. Aeschbach Jachmann, MD

Poster 38 - Description of Synthetic Cannabinoid Abusers Identified in a Drug Treatment Program
Timothy J. Wiegand, MD, FACMT, FAACFT

Poster 39 - Evaluation of Norbogaine Safety, Pharmacokinetics and Opioid Withdrawal Effects in Methadone-Dependent Patients
Gavin S. Cape, FACHAM, MRCPsych

Poster 40 - Creation of an Electronic Toolkit for Safer Opioid Prescribing in Primary Care
Payam Szegar, MD

Poster 41 - Lighting the Ember of Hope: Integrating Field Experience into Addiction Medicine Fellowships
Launette Rieb, MD, MSc, CCFP, FCP, DABAM

Poster 42 - Payer-Mandated Buprenorphine Dose Limit Led to Increased Abberant Drug Tests
Darius A. Rastegar, MD

Poster 43 - AST: A Simplified Tool for Managing Alcohol Withdrawal
Darius A. Rastegar, MD

Poster 44 - Impact of Hepatitis-C Status on Twenty-Year-Mortality of Patients with Substance Use Disorders
Michael Fingerhood, MD, FASAM

Abstract Award Winners
Late-Breaking Posters
Innovations in Addiction Medicine and Science

12:15 pm – 1:00 pm
**Status of Certification, Maintenance of Certification, Fellowships and ABMS Recognition – an Informative Session by ABAM**
Kevin Kunz, MD, MPH, FASAM
602, Sixth Floor

The recognition of Addiction Medicine by ABMS, and the accreditation of ADM fellowships by ACGME will create systemic and transformative change throughout medicine and healthcare. As has occurred with other recently recognized subspecialties, it is expected that patients, families and the nation will accrue benefits related to better health, lower medical and social costs, and acceptance that persons in any stage of any disease deserve competent and compassionate medical care. Recognition by ABMS requires a Certification Examination, and a Maintenance of Certification Program. The ABAM MOC program has been developed in accord with the ABMS guidelines, and continues to evolve in response to suggestions of diplomats. Fellowships are also a requirement for ABMS recognition, and since 2011 The ABAM Foundation has assisted in the establishment of 24 one and two year ADM Fellowships. The path to ABMS recognition and ACGME accreditation is paved with technical, regulatory, procedural, collegial and political issues. ABAM has been successfully traversing the path, and the timeline of ABMS recognition and ACGME accreditation of fellowships can now be reasonably stated. The effect of these changes on current diplomates, exam applicants and physicians wishing to become ADM certified in the future will be reviewed.

12:15 pm – 1:15 pm
**Child and Adolescent Addiction Work Group**
613, Sixth Floor

1:00 pm – 1:45 pm
**All About ABAM Certification and the Exam** (Not Available for CME)
Michael F. Weaver, MD, FASAM; Martha J. Wunsch, MD, FAAP, FASAM; Kevin Kunz, MD, MPH, FASAM; Terri Silver, MA
410, Fourth Floor

The ABAM Certification Examination will be offered on October 17, 2015 and the application deadline is July 1, 2015. This session will provide up-to-date information about the ABAM certification process and the exam and the benefits of certification. This includes information about the application process and preparing to take the exam for those considering and those who have decided to pursue ABAM Certification. Practical information will include tips to use to correctly complete the ABAM Certification application process before the application deadline. Useful information will also be provided about the content of the ABAM Examination and how examinees can prepare for it. This information will be useful to those considering taking the ABAM Certification Examination in October 2015 or later. Those attending will participate in an interactive question-and-answer session with the ABAM committee chairs who develop the exam and approve applicants, and with ABAM Diplomates themselves. Attendees will hear how certification has enhanced patient care and careers. The session will also encourage physicians to become ABAM Diplomates and enhance the Addiction Medicine practitioner workforce.

1:00 pm – 2:00 pm
**Principles of Addiction Medicine Editorial Meeting**
417B, Fourth Floor

Visit us at BOOTH #307 to preview the latest from ASAM, and the Journal of Addiction Medicine!

**NEW EDITION!**

*The ASAM Essentials of Addiction Medicine*, 2nd Edition
Abigail J. Herron, DO and Timothy Brennan, MD, MPH

Visit us at BOOTH #307 to purchase your copy before it publishes!
2:00 pm – 3:00 pm

WORKSHOP

Alternatives to Medication for Treating Traumatic, Physical and Psychospiritual Pain in Recovery

Charles W. Morgan, MD, FASAM, FAAFP, DABAM; Melvin Pohl, MD, FASAM; Stephanie M. Loeb, RN, BSN; Kenneth Thompson, MD, FASAM

Governor’s Ballroom A-C, Fourth Floor

With the recent, ever increasing and disturbing number of overdoses from opioids, benzodiazepines and other drugs, as well as the fact that one in ten deaths in the USA is related to alcohol use, national and state regulatory agencies, primary care physicians, and experts have become increasingly interested in effective interventions that do not always entail the use of medications. Seasoned experts will present methods of helping patients with problems, maladies, and situations that can sometimes commonly occur early or that may surface later in recovery, including acute and chronic physical pain, psychic and spiritual pain, and the pain of previous trauma. The positive adaptive nature of some uncomfortable emotions will be explored, and the effectiveness of the 12-step model in helping patients with these co-occurring problems will also be delineated. The workshop will provide both didactic and practical experience for the attendees, and it will provide a basis for participants to help their patients address emotional barriers that prohibit them from dealing effectively with compulsions. The presenters of this workshop are actually using in their practices, have published, lectured and demonstrated on, the alternative methods that will be discussed.

WORKSHOP

Best Practices for the Care of Pregnant Women with Addiction

Charles W. Schaubberger, MD, MS, CPE; Mishka Terplan, MD, MPH; Tricia E. Wright, MD MS

Governor’s Ballroom D, Fourth Floor

Addiction care and prenatal care can represent a significant challenge for both obstetricians and addiction specialists. The size of this population is growing and standards of care are in the early stages of development. A panel will discuss the current level of scientific support for current recommendations for care of women with drug addictions in pregnancy. Panel experts will discuss: screening obstetrical populations for drug use in early pregnancy, initiation of prenatal care, screening and management of comorbidities, co-management with behavioral medicine and addiction specialists, how pregnancy affects addiction care, and the safe management of labor, delivery and postpartum. The authors plan to present their protocols for the management of these patients, utilizing the best evidence in the literature to support their practices.

FOCUS SESSION

Medical Management for Opioid Use Disorders: Current Evidence and Future Directions

Darius A. Rastegar, MD; Anika Alvanzo, MD, MS; Kenneth Stoller, MD; Yngvild Olsen, MD, MPH

400/402, Fourth Floor

Individuals diagnosed with opioid use disorder have three FDA-approved options for pharmacotherapy to support their recovery—methadone, buprenorphine and naltrexone (both oral and extended release). There are important pharmacologic and regulatory differences between these options. These medications have traditionally been delivered in different settings and under varying models of care. While there is ample evidence to support the use of each of these medications, there is relatively little research comparing these treatments and models of care, or on matching patients to the optimal combination of medication, setting and model of care. Research on coordination of care and movement between medications and settings is even more scant. The presenters will review the use of each medication, focusing on comparative efficacy, logistical differences (e.g., setting, integrated services, regulations, availability), and models of care. The pros and cons of each will be reviewed with a focus on matching individuals to the optimal treatment. This will be concluded with a presentation on a novel integrated treatment model that provides a continuum of care with varying medications in different treatment settings.

WORKSHOP

Prescribe to Prevent: Overdose Prevention and Naloxone Rescue for Prescribers and Pharmacists

Alexander Y. Walley, MD, MSc; Jeffrey P. Bratberg, PharmD, BCPS; Corey Davis, JD, MSPH

Governor’s Ballroom E, Fourth Floor

This session is an educational program for prescribers, pharmacists, and addiction medicine providers that will help them prevent overdoses among their patients and patients’ social networks. Using didactic content, video vignettes, and an interactive practice implementation session, this workshop will review the epidemiology of overdose and rationale for distributing naloxone rescue kits to opioid users and their social networks, describe current implementation models, discuss how to incorporate overdose prevention into one’s practice and explain the legal and policy environment for naloxone rescue kit distribution. Developed with funding from the Substance Abuse Mental Health Services Administration, this program is a companion to the website www.prescribetoprevent.org, which includes resources to help health care providers educate their patients to reduce overdose risk and provide naloxone rescue kits to patients and their social networks.
**Treatment of Opioid Use Disorder within Correctional Facilities**
Sarah E. Wakeman, MD
410, Fourth Floor

The United States has the highest incarceration rate on the globe and one in thirty-three Americans are currently under some form of correctional control. This epidemic of incarceration is due in large part to the criminalization of addiction through harsh sentencing policies, such as mandatory minimum and three-strike laws. Half of US prisoners have an active substance use disorder (SUD) yet a minority received any formal treatment. Opioid agonist maintenance, among the most effective and evidence-based treatments for opioid use disorder, has been shown to reduce illicit opioid use, crime, recidivism, and cost. Despite this research, few correctional facilities provide these life-saving medications either during incarceration or upon release. Increased access to these treatments is necessary to address and prevent the costly and morbid incarceration epidemic. This session will begin with an overview of incarceration in the United States and the epidemiology of substance use disorder among prisoners. Presenters will review both national and international research and experiences with addiction treatment within correctional facilities with a focus on the evidence for opioid agonist treatment for prisoners with opioid use disorder. Presenters will conclude with a summary of international examples of how changes in drug policy impact substance use, morbidity, and cost.

**Get Involved in Policy Changes: Make Big Differences Using A Little Savvy**
Kelly J. Clark, MD, MBA, FASAM; Mark Jorrissch, MD, FASAM; Michelle Lofwall, MD; Molly Rutherford, MD
410, Fourth Floor

Addiction medicine practitioners, our patients, and our communities are impacted by a wide variety of existing and developing regulatory and payment policies. All types and levels of addiction professionals can make a difference in their communities and advance addiction medicine by getting involved in making policy changes. Members of the Kentucky Society of Addiction Medicine (motto: “Small but Mighty”) will present how they have each made small but strategic and impactful efforts to change addiction policies. Dividing the work among a handful of KYSAM’s interested leaders, KYSAM collectively works with their state medical society, state medical board, PDMP, governor’s office, legislators, state opioid treatment authority, other specialty societies and national ASAM. While this might sound difficult and a bit intimidating, this workshop will show you, too, how to use just a little savvy to make a big difference in policies that are important to you. Come to this workshop to exchange advice, inspiration, encouragement - and gain a little more savvy to make a big difference!

**Fast-Paced Overview of Addiction Medicine**
Sarah E. Wakeman, MD; Joshua Lee, MD, MSc
Governor’s Ballroom E, Fourth Floor

Using The ASAM Principles of Addiction Medicine (5e), this symposium will provide a rapid overview of core topics in addiction medicine. Speakers address the neurobiology of addiction and delve into the epidemiology of U.S. substance use disorders. The audience will gain valuable insight from medical professionals and also analyze the criminal justice system’s response to substance abuse. Presentation slides will dedicate a minute per topic, keeping an energetic pace. Speakers cover a range of familiar drugs, such as opioids, hallucinogens and stimulants, and also discuss novel designer drugs. Important distinctions in drug type pharmacology, intoxication and withdrawal syndromes will be acknowledged. Patient care is emphasized in aspects of screening and diagnosis, mutual help, and harm reduction for active substance users. Those attending will review the different addiction treatment models, including pharmacologic and behavioral interventions. Special demographics, like pregnant women and children/adolescent, will be incorporated into the presentation. The goal of this symposium is to provide the learner with a concise, structured, and evidence-based summary on the most recent scientific advances. Audience engagement is encouraged during the interactive question-and-answer session.

See page 3
FOCUS SESSION
Prediction of Alcohol Withdrawal Severity Scale (PAWSS) - Predicting Moderate-Severe Alcohol Withdrawal
Jose R. Maldonado, MD, FAPM, FACFE; Smita Das, MD, PhD, MPH; Anna Frenklach, MD; Sermosak Lolak, MD; Eric Neri, MS
412, Fourth Floor
The prevalence of alcohol use disorders among general medical units is up to 40%. Up to 20% of these patients develop symptoms associated with complicated alcohol withdrawal syndrome (AWS) including seizures and delirium tremens. AWS is associated with increases in morbidity and mortality, prolongation in hospital stays, inflated costs, and worsened cognitive functioning due to neuronal degeneration and death. Thus, identification and prevention can reduce the risk of brain damage and neurocognitive decompensation, medical comorbidities, and length of hospital stay. While several available tools quantify the severity of ongoing AWS, none predict subjects at risk of AWS, thus missing the opportunity for timely prophylaxis. Presenters prospectively tested and validated the Prediction of Alcohol Withdrawal Severity Scale (PAWSS), a new tool to identify patients at risk for developing complicated AWS, in a large population of medically-ill individuals. The use of PAWSS will minimize the excessive use of medications in those at low risk for complicated AWS, thus minimizing undesirable side effects.

WORKSHOP
Screening, Brief Intervention, and Referral to Treatment (SBIRT) for Perinatal Tobacco/Alcohol Use
Margaret S. Chisolm, MD; Mishka Terplan, MD, MPH; Tricia E. Wright, MD MS
Governor's Ballroom D, Fourth Floor
Participants in this highly interactive workshop will actively engage in well-tested role-playing exercises to practice their SBI skills in the cases of two women: one who is using alcohol during pregnancy and another who resumed use of cigarettes postpartum. Three very brief talks on perinatal tobacco/alcohol use, SBIRT principles, and maternal treatment options will be interspersed to review: 1) the epidemiology of perinatal tobacco/alcohol use and how the use of these substances during pregnancy may have additive or even synergistic effects on the health and well-being of the mother, fetus, neonate, and/or child; 2) the overall principles of SBIRT, as well as how to apply these principles in the care of pregnant and postpartum patients who are using tobacco/alcohol; and 3) various treatment options available to pregnant and postpartum tobacco/alcohol-using women and existing data on their effectiveness. By the end of the workshop, all participants will be able to describe the rationale for the use of SBIRT for perinatal tobacco/alcohol use and demonstrate skill in its use.

4:00 pm – 5:30 pm
SYMPOSIUM
PRESIDENT’S SYMPOSIUM - MARIJUANA: PATIENT TO POLICY
Stuart Gitlow, MD, MPH, MBA, DFAPA; Wilson M. Compton, MD, MPE; Kevin Sabet, PhD; Kevin Gray, MD; Patrick J. Kennedy, Former U.S. Representative, (D-RI)
Governor’s Ballroom A-C, Fourth Floor
Numerous states and the District of Columbia have passed measures that legalize marijuana, for medical and/or recreational use and additional states are considering the same. While ASAM opposes both the “medicalization” of marijuana and proposals that legalize marijuana for recreational use, clinicians continue to debate the harms and benefits associated with this drug. ASAM President Stuart Gitlow, MD, MPH, MBA, DFAPA will moderate a discussion with leaders of the debate to explore the burning issues confronting the field today and implications that recent and anticipated changes in marijuana legislation and treatment will have on clinical practice and patient outcomes. Hear the leading marijuana experts give their perspectives in lively ten-minute talks and submit your questions for the following discussion.

PRESIDENT’S SYMPOSIUM SCHEDULE
4:00 pm – 4:05 pm Opening Comments and Introduction of Panel
Stuart Gitlow, MD, MPH, MBA, DFAPA – ASAM President
4:05 pm – 4:15 pm Perspectives on Pot
Wilson M. Compton, MD, MPE – Deputy Director, National Institute on Drug Abuse, Bethesda, MD
4:15 pm – 4:25 pm Kevin Sabet, PhD – Director, Drug Policy Institute, University of Florida, Cambridge, MA
4:25 pm – 4:35 pm Kevin Gray, MD – Associate Professor, Department of Psychiatry and Behavioral Sciences and Medical University of South Carolina, Columbia, SC
4:35 pm – 4:45 pm Patrick J. Kennedy - Former U.S. Representative (D-RI), Founder, The Kennedy Forum, Brigantine, NJ
4:45 pm – 5:25 pm (Pot)pourri: A Moderated Expert Discussion
5:25 pm – 5:30 pm Closing Remarks
Stuart Gitlow, MD, MPH, MBA, DFAPA – ASAM President
4:00 pm – 5:30 pm
FOCUS SESSION

**Updates from the NIDA Clinical Trials Network: Management of Stimulant Use Disorders**

Geetha A. Subramaniam, MD, DFAPA; David S. Liu, MD; Andrew J. Saxon, MD; Larissa J. Mooney, MD; Madhukar H. Trivedi, MD; Theresa M. Winhusen, PhD

400/402, Fourth Floor

The NIDA National Drug Abuse Treatment Clinical Trials Network (CTN) has conducted several trials exploring innovative interventions for the management of cocaine or methamphetamine use disorders. Experts will present findings from these cutting-edge treatment intervention trials, which have examined combined medication strategies for addressing cocaine and methamphetamine use, the utility of dosed physical exercise as a behavioral intervention, and the efficacy of pharmacotherapy for cocaine relapse prevention. The CTN trials to be discussed are the following: (1) Accelerated Development of Additive Pharmacotherapy Treatment for Methamphetamine Dependence (ADAPT-MD), a study testing the combination of bupropion and extended-release depot naltrexone; (2) Cocaine Use Reduction with Buprenorphine (CURB), a study testing the combination of buprenorphine and extended-release depot naltrexone; (3) Stimulant Reduction Intervention using Dosed Exercise (STRIDE); and (4) Buspirone for Relapse-Prevention in Adults with Cocaine Dependence (BRAC).

5:30 pm – 7:30 pm

**THE ASAM RODEO RECEPTION - KICK UP YOURHEELS AND HAVE SOME FUN!**

Foyer, Sixth Floor

Put on your blue jeans and grab your ten-gallon hat and boots. Kick up your heels and enjoy a down home Texas reception while showing off your best 12-Step 2-Step. Get ready to have a rip-roarin’ time with good music, good food and good fun!

7:30 pm – 9:00 pm

**Journal of Addiction Medicine Editorial Meeting**

416A, Fourth Floor

---

7:45 pm – 8:45 pm

**Associate Member Roundtable – What Keeps you up at Night?**

Governor’s Ballroom E, Fourth Floor

We heard you! This interactive roundtable is for Associate Members to learn from one another by sharing challenges and successes. The session will include small group discussions among your peers to dive deeper into topics that matter to you. Come prepared with an issue or two to explore.

7:45 pm – 9:00 pm

**The ASAM Annual Conference Program Planning Committee Meeting**

408, Fourth Floor

8:00 pm – 9:30 pm

**ABAM Foundation 2015-16 Next Generation Awards for Adolescent Substance Use Prevention**

406, Fourth Floor

Presentation of the 2015-16 Next Generation Awards for emerging leaders who are pursuing addiction medicine fellowship training tailored to career objectives in prevention and early intervention with a focus on youth. The 2014-15 Next Generation fellows also will be recognized at the reception. All ABAM diplomates, as well as all other conference attendees, are invited to meet the fellows and learn more about their training and career goals. The Next Generation Awards are made possible with the generous support of the Conrad N. Hilton Foundation.

9:00 pm – 10:00 pm

**Mutual Help Meeting**

617, Sixth Floor

---

**THE EDUCATION OFFERINGS**

**Maintenance of Certification (MOC) - Approved Courses**

- Physicians enrolled in the ABAM Maintenance of Certification (MOC) Program can apply for a maximum of **20 AMA PRA Category 1 Credit(s)™** for completing the ASAM 46th Annual Conference.

- Physicians enrolled in the ABAM Maintenance of Certification (MOC) Program can apply for a maximum of **8 AMA PRA Category 1 Credit(s)™** for completing the ASAM 2015 Fundamentals Course.

- Physicians enrolled in the ABAM Maintenance of Certification (MOC) Program can apply for a maximum of **8 AMA PRA Category 1 Credit(s)™** for completing the ASAM Pain & Addiction Course: Common Threads XVI.

For more ASAM courses approved for MOC visit [www.asam.org](http://www.asam.org) and [www.abam.net](http://www.abam.net).
6:00 am – 7:00 am  
**MORNING FUN WALK/RUN**

**Hilton Austin Lobby (Meet in Lobby at 5:45 am)**

Join your colleagues and kick off the day with an energizing walk or run of your choice. Guides will lead participants around designated routes. Interested participants are encouraged to sign-up on-site near the ASAM Registration Area but walk-ups are always welcome.

---

8:00 am – 9:30 am  
**GENERAL SESSION**

**THE ASAM POLICY PLENARY: CONSEQUENCES OF CHANGING THE BUPRENORPHINE PRESCRIBING LIMIT**

Organized by ASAM Public Policy Committee,  
**Co-Chairs:** Scott Teitelbaum, MD, FAAP, FASAM; Mark Kraus, MD, FASAM  
**Keynote:** H. Westley Clark, MD, JD, MPH, CAS, FASAM  
Former Director, Substance and Mental Health Services Administration’s Center for Substance Abuse Treatment (SAMSHA) and 2015 ASAM Annual Award Winner

**Governor’s Ballroom A-C, Fourth Floor**

According to a 2013 CDC report, our nation is experiencing an epidemic of opioid addiction and overdose death. Policy makers and health officials have targeted a number of policy alternatives intended to stem the epidemic including prescription drug monitoring programs, drug take-back initiatives and increasing access to naloxone. ASAM is recommending that expanding access to treatment, including pharmacotherapies to treat opioid addiction, also be considered. For many ASAM practitioners, the 30/100 patient buprenorphine prescribing limit is considered a barrier to treatment. This plenary session will discuss the consequences of raising the prescribing limit and of maintaining the current limit.

**Continuum is Here, The ASAM Criteria Decision Engine**

**Austin Grand Ballroom Foyer, Sixth Floor**

*Continuum, The ASAM Criteria Decision Engine™, is the first ever standardized tool for assessing and caring for patients with addictive, substance-related and co-occurring conditions. Powered by over two decades of research and development, this user-friendly tool helps clinicians identify individual treatment needs, priorities and level of care setting based on the world-renown ASAM Criteria decision logic. See firsthand how Continuum™ can revolutionize addiction care.*

---

**Complimentary Coffee & Tea Available**

**ALL DAY IN EXHIBIT HALL**
With the gradual acceptance of the disease model of addiction, SUDS have come to be seen as mainstream health problems that require attention throughout the continuum of healthcare. The historical marginalization of SUDs treatment has required deliberate and novel attempts integration. This panel presentation will provide a conceptual framework for the integration of SUDS treatment within the healthcare system and present two recent examples of successful integration. The scope of work completed by the addiction professionals included screening, brief intervention, consultation, discharge planning, family consultations and warm hand offs to community based detoxification and SUD treatment services. Outcomes generated by the integration of SUD and peer mentoring services include the movement of alcohol and drug 30 day readmissions from the 2nd most frequent to off the top 25 list in the Emergency Department, average reduction in length of stay of 1.3 days for patients admitted for alcohol and drug related DRG, and a corresponding reduction is cost per discharge for alcohol and drug related admissions. The ongoing integration efforts continue to expand access to evidenced based SUD interventions including medication assisted treatment and opiate withdrawal support and services.
11:00 am – 12:30 pm

WORKSHOP

Motivational Interviewing: Evoking Change Humanely
Peter Selby, MBBS, FCFP, DABAM, FASAM; Ramm Hering, MD, CCFP, MSc, Dip PH

Governor’s Ballroom E, Fourth Floor

This fun, interactive, and experiential session engages learners using the spirit (compassion, acceptance, partnership and evocation) and processes (engaging, focusing, evoking and planning) of Motivational Interviewing (MI). The main focus is to learn the core skills essential to evoking change in patients who are ambivalent. They will learn how to recognize and respond to “change” and “sustain” talk. Learners are engaged immediately in co-creating learning objectives followed by demonstration of MI skills (open-ended questions, affirmations, reflections, and summarizing). They will learn how to change discord and come alongside the patient during conversations. By using a guided “real play”, participants get a taste of MI by practicing specific questions to scale readiness to change, explore ambivalence and evoke motivation. This is followed by learning strategies to develop change plans and most importantly, how to give advice so patients can hear it without harming the doctor-patient relationship. The workshop concludes with a reflection on next steps for the learners.

WORKSHOP

When Opioids Fail: Treating the Patient Trapped on High Dose Opioids
Herbert L. Malinoff, MD, FACP, FASAM; Mark A. Weiner, MD; Melvin Pohl, MD, FASAM

406, Fourth Floor

The misuse and overuse of prescription opiates continues to increase. Overdose deaths from prescription opioids outnumber overdose deaths from opioid addiction despite increased awareness of the problem among physicians. Many physicians are not adequately trained to treat these patients once there is a failure of chronic opioid therapy. The goal of this workshop is to educate practitioners in identifying problematic opioid use in their patients, and to assist practitioners in the appropriate strategies for discontinuing opioids. Primary care physicians, as well as addiction medicine and pain management specialists, will be able to identify problematic opioid use, unintended consequences of opioid misuse, and to appropriately withdraw patients from chronic opioid medications. Attendees will gain practical experience in the management of these patients via brief didactics and extended case discussions and analysis of published data. Presenters will present data concerning their clinical experience in the medical withdrawal of chronic pain patients from opioids in both the outpatient and inpatient setting. Non-pharmacologic long-term strategies for treating these patients will also be presented.

THE ASAM ANNUAL AWARDS LUNCHEON

Saturday, April 25, 2015 | 12:30 pm – 2:30 pm
Governor’s Ballroom A-C, Fourth Floor (Ticketed Event)

Draw inspiration from the outstanding accomplishments presented by this year’s ASAM annual award winners and celebrate the 2014 Diplomates of the American Board of Addiction Medicine (ABAM) at the ASAM Annual Awards Luncheon.

John P. McGovern Award
To recognize and honor an individual who has made highly meritorious contributions to public policy, treatment, research, or prevention which has increased our understanding of the relationship of addiction and society.

Mark S. Gold, MD, FASAM
As the John P. McGovern Award recipient, Dr. Mark S. Gold will deliver the 2015 lecture on Addiction and Society during the Awards Luncheon: “From State Dependency to Clonidine to Dopamine to Second Hand Smoke to Food Addiction: My Career In Translational Research From 1972.” Currently, Dr. Gold is an Adjunct Professor of Psychiatry at Washington University in St. Louis and the Chairman of the Scientific Boards for RiverMend Health.

Dr. Gold is a translational researcher, author, and inventor best known for his pioneering work on the brain systems underlying the effects of opiate drug. He was the first Editor of Addiction Medicine for Up To Date and the author of many practice guidelines, ASAM papers and texts for clinicians. He has served on numerous NIDA, ONDCP, CASA, DEA, Betty Ford and Psychiatric Boards and panels. Since his career in translational research began in the early 1970s, his work has laid the foundation for others who followed in Addiction research. Dr. Gold is a multiple patent holder, author of nearly 1,000 scientific articles, chapters, textbooks, and general audience books.

ASAM 2015 AWARD RECIPIENTS

R. Brinkley Smithers Distinguished Scientist Award
To recognize and honor an individual who has made highly meritorious contributions in advancing the scientific understanding of alcoholism, its prevention and treatment.

George F. Koob, PhD

ASAM Public Policy Award
To recognize an elected official (federal, state, local) who has effectively advanced public policies that promote the health of Americans, especially persons with addictions; addiction medicine physicians; the education of physicians and medical trainees regarding substance use and addiction; or recognition of the practice of addiction medicine.

Michael P. Botticelli

Presidential Award
To recognize an individual for his or her notable achievements in advancing ASAM’s role in promoting research and increasing treatment effectiveness while bringing honor and acclaim to the Society.

Alexis Geier-Horan, MPP

2015 Media Award
To recognize a newspaper, magazine, television, radio or website story, column, film or program that improves the public’s understanding of addiction, addiction treatment, recovery, or the profession of addiction medicine.

Bess O’Brien

ASAM Annual Award
To recognize outstanding contributions to the growth and vitality of our Society, for thoughtful leadership in the field, and for deep understanding of the art and science of Addiction Medicine, and for expanding the frontiers of the field of Addiction Medicine and broadening our understanding of the addictive process, through research and innovation.

Photos from Top to Bottom
H. Westley Clark, MD, JD, MPH, CAS, FASAM
Paul H. Earley, MD, FASAM
Richard K. Ries, MD, FAPA, FASAM

Young Investigator Award
To recognize the best abstract by an author who is within five years receipt of a doctoral degree.

Crispa J. Aeschbach Jachmann, MD

ASAM Annual Conference Program Planning Committee Award
To recognize the best abstract receiving the highest rating for its scientific merit.

Terry Horton, MD

ASAM/Millennium Research Institute Annual Conference Program Committee Award
To recognize the best abstract submitted on the topic of drug testing, medical management, or biomarkers.

Ashwin A. Patkar, MD, MRCPsych

ASAM/Millennium Research Institute Research Fellowship Award
To recognize the best proposal by an Addiction Medicine Fellow on the topic of medication monitoring and drug testing.

Ahmed Hassan, MD, FRCP
new inpatient substance use POC are being implemented in response to specialized care settings for alcohol/tobacco screening, brief intervention, referral to treatment, and ongoing monitoring. At peer-reviewed hospitals and community settings, this model is being implemented to systematically identify and intervene on substance use disorders, while also offering comprehensive care for co-occurring medical and psychiatric conditions. Presenters will address the rationale for implementation, special considerations for inpatient settings, and examples of how these models have been adapted to fit unique healthcare systems and patient populations.

FOCUS SESSION

Designer Drugs Update 2015: Bath Salts, Spice, and N-bomb
Michael F. Weaver, MD, FASAM; John A. Hopper, MD, FASAM; Erik W. Gunderson, MD, FASAM
412, Fourth Floor

Patterns of drug abuse are constantly changing. This is particularly the case regarding new psychoactive substances or designer drugs, in which new variants are continually emerging with uptake especially among young adults. New synthetic designer drugs can be challenging to identify and treat effectively, especially serious medical and psychiatric complications. This is important for practitioners, as new designer drugs have resulted in multiple deaths, as well as other significant health consequences to users. This session will educate practitioners about several newer designer drugs regarding use trends along with psychotropic and health effects. Attendees will be provided with evidence-based clinical knowledge to help identify and treat complications from newer designer drug use, especially those with life-threatening complications. Attendees will have the opportunity to participate in an evidence-based discussion—including clinical case examples—that will focus on emerging designer drugs, including cathinones (bath salts), synthetic cannabinoids (spice), and synthetic hallucinogens (N-bomb). The emphasis will be on clinical issues, especially recognition of intoxication, problems related to detection with urine drug testing, and treatment of medical and psychiatric complications.

FOCUS SESSION

From Mandate to Action: Redesigning Substance Use Care in Inpatient Settings
Lauren M. Broyles, PhD, RN; Sarah E. Wakeman, MD
400/402, Fourth Floor

Substance use is common in hospitalized patients. Recent quality/performance measures and strategic initiatives aim to systematically and comprehensively address substance use during the hospital stay. However, to date, there is little practical guidance for implementation of substance use processes of care (POC) that are specific to the inpatient care setting and patient populations. In this presentation, experts will present exemplars of how two large academic medical centers (VA Pittsburgh Healthcare System and Massachusetts General Hospital) are redesigning processes of care to respond to substance use in inpatient general medical settings. At VA Pittsburgh, new inpatient POC are being implemented in response to VA-mandated Joint Commission measures for alcohol/tobacco screening, brief intervention, referral to treatment, pharmacotherapy, and follow-up. At Massachusetts General, new inpatient substance use POC are being implemented in response to community input and strategic redesign. Presenters will address topics such as the rationale for implementation, special considerations for inpatient settings, unique features of each healthcare that shaped implementation, facilitators and barriers to implementation, and the advantages and disadvantages of different evaluation strategies.
2:30 pm – 3:30 pm

FOCUS SESSION

Intimate Partner Violence and Relationship with Substance Addiction in Childhood and Adulthood
Richard G. Soper, MD, JD, MS, FASAM, DABAM; Hendree Jones, PhD

410, Fourth Floor

Substance use plays a facilitative role in intimate partner violence (IPV) by precipitating or exacerbating violence. Although IPV remains a public health concern, there have been advances in our basic understanding of how to treat both victims and perpetrators with co-occurring substance abuse and addiction. This workshop will provide clinicians with specialized tools to confidently and competently identify and intervene on substance use and IPV. At the end of the workshop addiction medicine specialists will leave a neurodevelopmental view of childhood trauma that can help guide assessment and intervention with IPV victims. Providers will also acquire practical tools to identify past and current IPV, make brief office interventions to assist IPV victims, and offer strategies to refer women for subspecialty and community-based evaluation, treatment, and advocacy.

WORKSHOP

Twelve Step Programs as a Vehicle to Recovery
Melvin Pohl, MD, FASAM; Mark A. Weiner, MD; Terry Alley, MD, FASAM, DABAM, MRO

406, Fourth Floor

There is no doubt that 12-step programs have benefited millions of people with the disease of addiction around the world. It is imperative that every addiction specialist be familiar with the basic precepts of this recovery model so that he/she might make appropriate referrals to this mutual support network. There is a growing body of literature that supports the use of the 12 steps for recovery from substance use disorder as well as behavioral addictions. With the new definition of addiction from ASAM including the fact that addiction is a biopsychosocial spiritual disease, it is imperative for clinicians working in the field of addiction to become adept at referral to these programs as well as understanding the basic concepts involved in twelve step recovery. Via a “mock” 12-step meeting, these programs will be demonstrated and the principles that underlie the experience will be explored by the faculty with participants. Ample time will be provided to discuss and respond to questions from the audience.

3:30 pm – 4:00 pm

Refreshment Break in the Foyer
Governor’s Ballroom Foyer, Fourth Floor

4:00 pm – 5:00 pm

WORKSHOP

A Video Game Therapeutic Intervention for Youth: Demonstration of “Recovery Warrior”
Marc Fishman, MD; Daniel Greenberg

410, Fourth Floor

There has been considerable recent interest in the use of technology as a tool to augment addiction treatment, especially for youth. Because of the very high levels of background youth involvement in electronic entertainment, video games, may be of particular value for development of therapeutic applications. The inherent reinforcing properties of video gameplay are expected to make treatment more fun, promote treatment engagement, reinforce anti-drug attitudes, mobilize treatment participation and alliance through physical and psychological activation, promote motivation and intentional stance towards abstinence and recovery. In this workshop we will present: a summary of the previous research on therapeutic uses of gaming in addiction, the rationale for our specific design and overview of the game components, plans for counselors to incorporate gameplay as a therapeutic tool in standard treatment settings, the results of initial testing with patients and counselors in a youth treatment program. We are particularly interested in participant feedback in anticipation of the NIDA-funded randomized controlled trial, to begin enrollment Fall, 2015.

FOCUS SESSION

Adolescent Vapor Use and Emerging Trend of Vaporized Illicit Substances
William E. Tankersley IV., MD, APBN, DABAM; Brandon Ferrell, PhD

412, Fourth Floor

Over the past few years, we have been seeing a steady increase in the number of adolescent patients presenting for treatment that have reported nicotine vaporizer use. We are now beginning to see the same trend with vaporized illicit substances as well. The CDC has collected epidemiological data illustrating the increasing prevalence of nicotine vaporizer use among adolescents. This presentation will provide a brief overview of the history of e-cigarettes including: development, content, marketing, legal status, harm reduction and smoking cessation. Special focus will be paid to adolescent issues involving e-cigarettes including usage rates, laws regulating access to minors, and the emerging trend of adolescents using illicit substances through e-cigarette devices. This presentation will also review the current state of the literature and data.

WORKSHOP

Common Addiction Medicine Conundrums: “Just Bad Behavior?” & “What is Depression?”
Michelle Lofwall, MD; Margaret S. Chisolm, MD

Governor’s Ballroom E, Fourth Floor

Participants in this highly interactive workshop will practice role-playing what to say to a patient who is suspected of diversion or misuse without being enabling or terminating treatment and how to differentiate demoralization from major depression, after being explicitly taught these skills via two brief talks. In addition, a series of patient cases with questions about clinical management will be discussed in order to foster further discussion among participants and speakers. The case questions will highlight the clinical skills that providers can employ with their patients and the common pitfalls of oversimplification and misplaced emphasis. By the end of the workshop, all participants will be able to describe and feel confident in implementing clinical processes for evaluation and management of medication diversion and misuse and complaints of depressed mood.
FOCUS SESSION

It Hurts Too Much to Quit: Managing Chronic Pain in Addiction Treatment
Michael Sprintz, DO
Governor’s Ballroom E, Fourth Floor

A continuing challenge among addiction treatment providers is both accurately assessing and effectively managing chronic pain in either the inpatient or outpatient setting. Addressing chronic pain in the addiction treatment milieu is complex and challenging, requiring a different skill set and approach to successfully manage. Differentiating the patient with chronic pain and addiction from the patient with addiction presenting as chronic pain can be a challenge. Correctly identifying a patient with chronic pain and physical dependency without addiction can be almost impossible when addiction treatment providers, while exceptionally good at dealing with uncomplicated addiction, have never been trained to differentiate complicated medical and behavioral co-morbid presentations, nor have they been given the tools to appropriately manage such challenging patients. This presentation highlights the challenges of treating addiction patients with chronic pain and offers rational solutions to help manage pain, stay sober, and establish a long-term pain and recovery treatment plan.

FOCUS SESSION

Implementing the National Clinical Guideline: Improving Quality of Care in Addiction Medicine
Margaret Jarvis, MD, FASAM; Kyle M. Kampman, MD; Yngvild Olsen, MD, MPH
Governor’s Ballroom D, Fourth Floor

This session will explore ASAM’s development of a national practice guideline for the treatment of SU, including both pharmacotherapy and psychosocial interventions. An expert panel consisting of representatives from the ASAM Quality Improvement Council (QIC), ASAM Guideline Committee, Treatment Research Institute (TRI) and Providers’ Clinical Support System for Medication Assisted Treatment (PCSS-MAT) will discuss the guideline development process and the completed guideline’s future use in clinical practice. The speakers will also examine the guideline’s impact on the field of addiction medicine and its associated policy implications, such as how payers may view it, in light of reimbursement for addiction treatment. This was written with a contracted relationship with TRI, and utilized the RAND RAM methodology.

FOCUS SESSION

Safer Prescribing of Controlled Substances: a Legal Perspective
Stacey L. Worthy, Esq; Michael C. Barnes, Esq
406, Fourth Floor

In recent years, the prescription drug abuse epidemic has generated the public attention that substance use of all kinds has long deserved. As such, controlled substance prescribers face intense scrutiny now more than ever. Prescribers must be aware of the civil and criminal liability that they may face for improper prescribing and billing practices and must implement comprehensive strategies to ensure compliance with state and federal laws and regulations. This presentation will provide an overview of laws and regulations that govern controlled substance prescribing, including DATA 2000; state and federal health care fraud and abuse laws, such as Stark Law and the anti-kickback statute; Medicare and Medicaid reimbursement restrictions; and privacy requirements. Employing case law and their practical experience, the presenters will provide prescribers with an understanding of how to comply with these laws and ensure that safeguards are in place to protect the safety of their patients and prevent civil and criminal violations.

5:00 pm – 6:30 pm
Quality Improvement Council
617, Sixth Floor

5:30 pm– 6:30 pm
Primary Care Interest Group Meeting
416A, Fourth Floor

The ASAM State of the Art Course Program Planning Committee Meeting
616AB, Sixth Floor

5:30 pm – 7:30 pm
ASAM Donors/Ruth Fox Reception (By Invitation Only)
Austin Grand Ballroom - Salon J Foyer, Sixth Floor

This invite-only reception is to honor donors who have made significant contributions to the Endowment during the past 12-18 months. This year’s reception will be dedicated in the memory of Max Schneider, MD, FASAM, who served as the Chair of the Endowment for 22 years. Participants will also celebrate the 25th Anniversary of the Ruth Fox Memorial Endowment Fund.

6:00 pm – 7:30 pm
MEET & EAT - DUTCH TREAT DINNERS
Austin Hilton Lobby (Meet in Lobby at 5:45 pm)

Don’t dine alone - enjoy a casual Dutch treat (pay for your own meal) dinner with colleagues. Choose from a number of unique Austin eateries and different cuisines to meet new friends as you get a taste of the town. Interested participants should sign up on-site near the ASAM Registration Area. (Dinner is at your own cost, not covered by ASAM).

8:00 pm – 10:00 pm
ASAM MOVIE NIGHT - FEATURING: THE HUNGRY HEART
Governor’s Ballroom E, Fourth Floor

The Hungry Heart provides an intimate look at the often hidden world of prescription drug abuse through the world of Vermont pediatrician Fred Holmes who works with patients struggling with this disease. Enjoy popcorn and refreshments as you watch the film and stay for a lively discussion following the movie with director and ASAM 2015 Media Award Winner, Bess O’Brien, special guest Raina Lowell, one of the women featured in the film, and ASAM moderators Todd Mandell, MD, Northern New England Chapter President and Geoffrey Kane, MD, MPH, FASAM, Chief of Addiction Services, Brattleboro Retreat.

10:00 pm – 11:00 pm

**Cultural Competence in the Delivery of Addiction Treatment Services**
Deidra Y. Roach, MD; Constance Weisner, DrPH, LCSW; Kamilla Venner, PhD;
Denis Antoine, MD
Governor’s Ballroom B, Fourth Floor

Presenters will address best approaches to providing culturally competent services to people seeking services for the treatment of alcohol and other substance use disorders, and to eliminating race/ethnicity-based inequities in the delivery of those services. Attendees will understand the standards for the delivery of Culturally and Linguistically Appropriate Services in Health Care (CLAS), published by the Office of Minority Health in 2012. Attendees will learn the importance of staff diversity in healthcare systems and increased accessibility to translated materials and qualified interpreters. In addition to providing an overview of the components of culturally competent care and models for the delivery of culturally competent services as they pertain to patient assessment, treatment, and follow-up, the session will include several case studies illustrating key principles. These case studies will inform the development and maintenance of culturally competent systems of care for people living with substance use disorders.

---

**WORKSHOP**
**Five-Year Recovery: A New Standard for Assessing Effectiveness of Treatment**
Robert L. DuPont, MD, FASAM; Mark S. Gold, MD, FASAM; Wilson M. Compton, MD, MPE; Thomas McLellan, PhD
Governor’s Ballroom D, Fourth Floor

Despite years of support for the concept of addiction as a “chronic disease” that requires addressing multiple patient needs over many years, much substance abuse treatment is implemented as short-term, stand-alone care. Patients are treated for one substance at a time without regard for the reality that there are few patients using only one addictive substance. The commitment of medicine to emphasize prevention, including preventing relapse, and chronic disease management is conspicuously missing in substance abuse treatment. The model of physician health programs (PHP) has set a new standard for long-term outcomes for substance use disorders. These outcomes are evaluated over the course of five years with the standard of not using alcohol or other drugs of abuse. Presenters propose adopting a similar five-year recovery outcome standard for substance abuse treatment. Adopting this standard would create a standard against which all treatments for substance use disorders are measured and encourage treatment programs to adapt their programs to better achieve this goal. This standard is similar to the standard five-year survival rates used in cancer treatment.

---

**WORKSHOP**
**Updates in Treating Sedative Dependency In Addiction And Chronic Pain**
Herbert L. Malinoff, MD, FACP, FASAM; Mark A. Weiner, MD; Melvin Pohl, MD, FASAM
Governor’s Ballroom A, Fourth Floor

Sedatives in addiction or chronic pain patients present hazards to both recovery in the individual and in the treatment/management of chronic pain in them. The long-term use of sedatives is known to produce cognitive impairment, visual-spatial impairment, as well as worsening mood and a “downward spiral” of worsening pain perception and dysfunction in susceptible patients. Patients with chemical dependency are at higher risk for relapse when these mood altering medications are prescribed. The use of sedatives can destabilize even a robust recovery program. Presenters will seek to assist practitioners in identifying if and when sedatives become problematic in their patients, and in developing the appropriate treatment strategies from withdrawal from sedatives. Primary care physicians, pain and addiction specialists will be able to identify problematic sedative use, unintended consequences of sedative use, and to appropriately withdraw patients from chronic sedative medications. The difficulties involving medical withdrawal from sedatives will be discussed as well as the implementation of pharmacologic and non-pharmacologic treatment strategies and aftercare for the sedative dependent patient. Data summarizing inpatient and outpatient medical withdrawal will be shared. Audience questions and comments regarding general issues or specific cases will be encouraged throughout the presentation.

**8:00 am – 9:30 am**

**WORKSHOP**

**URINE DRUG TESTING “FOR” YOUR PATIENT NOT “TO” YOUR PATIENT - PART 1**

Howard A. Heit, MD, FACP, FASAM; Michael Sprintz, DO; Gary M. Reisfield, MD

Governor’s Ballroom C, Fourth Floor

Part 1 of this two-part workshop aims to increase clinicians’ knowledge and confidence in utilizing urine drug testing (UDT) in clinical practice. This session will be divided into three parts highlighting the various important aspects of UDT. Presenters will first cover the basic science of urine drug testing, differentiating between qualitative and quantitative UDT. After basic knowledge is developed, presenters will discuss patient-centered UDT and how it may be utilized to improve communication with patients in order to achieve therapeutic goals. Finally, presenters will explain how to start implementing UDT in clinical practice by designing a UDT protocol and selecting a testing laboratory. The emphasis of this session will be on using UDT for a patient’s benefit rather than as a punitive tool.

**10:00 am – 11:30 am**

**WORKSHOP**

**Addiction is Addiction: Clinical Perspectives from Definition to Practice**

Raju Hajela, MD, MPH, FCP, FASAM, DABAM; Stuart Gitlow, MD, MPH, MBA, DFAPA; Howard Wetsman, MD, FASAM, DABAM

Governor’s Ballroom B, Fourth Floor

The ASAM Definition of Addiction has established the recognition and evaluation of patients along biological, psychological, social and spiritual dimensions to appreciate the full breadth of the disease of brain reward, motivation, memory and related circuitry that leads an individual to pathologically pursue reward and/or relief with the use of substances and other behaviors. As much as specific substances and behaviors have their own complications, the basic disease process needs to be recognized to appreciate that substances are not the disease nor are they necessarily the cause of the disease. Substances and behaviors are aggravating factors that perpetuate and complicate the disease, which requires ongoing treatment in a chronic disease framework for long term recovery, while addressing all aspects of an individual’s life in context of their family and community. This workshop will review the development of the definition; the components of a comprehensive assessment and treatment process that takes into account concepts and definitions related to abstinence, recovery, sobriety etc.; and present a practical perspective on holistic recovery that may or may not include the use of medications. Concepts of abstinence-based recovery and medication assisted recovery (MAR) will be reviewed to encourage comprehensive treatment and promote recovery along biological, psychological, social and spiritual dimensions.

---

**SUNDAY, APRIL 26, 2015**

**WORKSHOP**

**Lifelong Learning: Review of Articles for ABAM MOC Part 2**

Michael F. Weaver, MD, FASAM; Lia Bennett, MPH; Michael Fingerhood, MD, FASAM; Alexander Y. Walley, MD, MSc

Governor’s Ballroom D, Fourth Floor

Participants will gain an appreciation of the scope of recent research in addiction medicine and how it may impact patient care. In addition, participants will learn about new research that may potentially affect their practice. Recent articles in addiction medicine selected for MOC Part 2 will be reviewed and critiqued to demonstrate the process and educate participants on the latest research findings in addiction medicine, including how this impacts patient care. ABAM Diplomates who attend and are participating in MOC will be able to answer Part 2 Self-Assessment Modules (SAMs) questions for MOC credit during this workshop. Attendees will have a demonstration of the ABAM MOC web portal and be able to log on in real-time during this workshop to review and participate in MOC Self-Assessment Modules (laptop or tablet with WiFi connection required for this—please bring to the workshop if desired).

---

**SYMPOSIUM**

Co-Sponsored by: International Society of Addiction Medicine (ISAM) and the National Institute on Drug Abuse (NIDA)

**Role of Cannabinoids in Medicine/Addiction Medicine**

Jag H. Khalsa, MS, PhD; Marc Galanter, MD, FASAM; Robert L. DuPont, MD, FASAM; Greg C. Bunt, MD, FASAM

Governor’s Ballroom A, Fourth Floor

Worldwide, an estimated 200-500 million people smoke cannabis daily, making it as the most widely abused illicit drug in the world. Currently, there is a worldwide move to legalize its use for medical purposes, even though there is no clinical trials-based scientific/evidence that smoking cannabis is effective in the treatment of any medical condition. On the other hand, many of its chemical constituents such as cannabinoids including cannabidiol may have some, but yet to be confirmed pharmacologic and therapeutic activity. In this collaborative session, leaders from NIDA, ISAM and ASAM, will discuss the issue of global importance, the role of cannabinoids in medicine, with emphasis on addiction medicine, and future research on cannabinoids. Speakers will discuss their current research experience and efforts that they are engaged in conducting research on cannabinoids. In addition, funding opportunities at NIDA/NIH will be presented.

---

**WORKSHOP**

**URINE DRUG TESTING “FOR” YOUR PATIENT NOT “TO” YOUR PATIENT - PART 2**

Howard A. Heit, MD, FACP, FASAM; Michael Sprintz, DO; Gary M. Reisfield, MD

Governor’s Ballroom C, Fourth Floor

Building on the knowledge base developed in part 1, part 2 of this workshop will focus on clinical applications and skill building. Through the use of role play and case studies, presenters will demonstrate common clinical challenges and ways to approach them. This session will highlight constructive communication with patients – communication that maintains therapeutic relationships without sacrificing treatment goals. This session will also use case studies to review the basic and applied science of UDT and emphasize the appropriate tests to use, correct test interpretation, and next steps. This workshop session will provide practical clinical information that will have the potential to immediately impact therapeutic outcomes.

---

www.TheASAMAnnualConference.org
Join us for the 6th Anniversary of the premier addiction conference — the West Coast Symposium on Addictive Disorders (WCSAD). WCSAD is dedicated to continuing education and networking in the field of addictions. In 2014, WCSAD hosted more than 850 attendees. Like its sister conference, the Cape Cod Symposium on Addictive Disorders (CCSAD), WCSAD combines workshops and seminars on timely industry topics with an unmatched showcase of the industry’s products, services and facilities. We look forward to seeing you there!

WCSAD 2015 is excited to announce a special partnership with the newly founded International Association of Family Addiction Professionals (IAFAP). IAFAP will be hosting its first conference in conjunction with WCSAD 2015. The mission of IAFAP is to educate and support family addiction professionals in their work and families. Attendees of the IAFAP track at WCSAD can earn up to 12 CEs, up to 28 hours total for the entire conference.

NEW for 2015!
ASAM EXHIBIT HALL PASSPORT GAME – ON THE CONFERENCE APP

For the first time conference attendees have the opportunity to learn and win prizes through the new, interactive Exhibit Hall Passport Game. This is available to all attendees on the official conference app. Learn and have fun while playing to win prizes as you walk through the exhibit hall.

HOW TO PLAY THE PASSPORT GAME
• During the exhibit hall hours, visit participating exhibitors and scan the QR code in their space with your mobile device.
• It will unlock a unique trivia question. Then, engage with the exhibitor to answer the question correctly to accumulate points.
• Attendees with over 1,200 points will be entered in a raffle for three levels of exciting prizes!

PRIZE DRAWINGS
The prize drawings are on Saturday, April 25th at 10:00 am in the Exhibit Hall. An official email notification will be sent out to prize-winners. Play for your chance to win one of the following prizes:

- Two Nights Complimentary for The ASAM 47th Annual Conference (includes breakfast)
at Hilton Baltimore, MD
Valid through April 30, 2016 – Value of $500

- Two Nights Complimentary for the 2015 ASAM Review Course
at Bonnet Creek Hilton & Resort in Orlando, FL
Valid through April 27, 2016 – Value of $500

- Complimentary CME Content
on ASAM’s NEW online e-Learning Center – Value of $300

DON’T miss this opportunity to learn and win prizes! Questions? See staff at the ASAM Central Desk near registration.

Get Free WiFi! See page 3
Get The APP! See page 58
A Step-By-Step Guide to Using the ASAM Annual 2015 App

STEP 1
Download the “ASAM Annual 2015” app from the Apple App Store or Google Play Store. To start using the app, press login and enter your username (your email) and password.

STEP 2
Find the presentation you want quickly and interact with the presentation slides by drawing on slides and highlighting text. Use the note-taking mode to type your notes next to each slide.

STEP 3
Print the notes you took inside the app from your “Online Personal Summary,” accessible from the app’s main screen or email yourself the link by selecting “Email Summary Link” in the app’s settings. You can print the full presentation with your notes or choose to print just your notes.

The ASAM Board Review Course in Addiction Medicine is widely recognized as the essential primer for physicians and other health care professionals who are preparing for a career in addiction medicine, as well as for primary care providers who wish to increase their skills in identifying and managing patients whose medical problems are caused or exacerbated by substance use disorders.

- The course offers three days of sessions which are mapped to the ABAM blueprint of topics for the exam and features outstanding faculty.
- ASAM’s Review Courses have had a major impact on advancing a common base of scientific knowledge among physicians and other health care professionals.
- Register at www.ASAMReviewCourse.org
